

INCOSE Wasatch Chapter

Systems Engineering Education Opportunities at the University of Utah - Dr. Benjamin Goldberg

Dr. Goldberg will walk us through the U of U Systems Engineering Certificate.

- Dr. Goldberg is an adjunct Professor at the University of Utah, as well as Director of Technology at ATK Launch Systems.
- The Graduate Certificate in Systems Engineering:
 - Addresses the need for engineers with training in complex engineering systems, such as in the aerospace industry and the military.
 - Provides engineers with the tools and processes to design and manage complex mechanical and organizational systems.
 - Provides participants with an understanding of the fundamentals of systems engineering and the ability to develop, analyze, and model systems of all kinds.
 - Enables participants to develop both general system performance requirements and quantitative system metrics for the management and evaluation of system performance.
 - Enables participants to perform cutting edge research in systems engineering, suitable for peer reviewed publication
- Dr. Don Blosswick, Director of the U of U Systems Engineering Certificate Program, will be available to answer questions relating to program requirements and admission criteria.

WHEN: Thursday December 1st @ 6:00pm

WHERE: L-3 Communications
640 North 2200 West
Salt Lake City, UT

WHAT: Presentation by Dr. Goldberg followed by Q&A

Please RSVP by November 28th

Shane Franz (john.shane.franz@L-3com.com) OR January Anderson (janeuary.anderson@sncorp.com)
