

INCOSE Healthcare WG

NOV 29, 2016 Webinar

Topic: Using *Atlas* to Map a Healthcare Systems Engineering Career

Presenter: Nicole Hutchison, Ph.D., Research Engineer, Systems Engineering Research Center (SERC)

Abstract

Abstract: *Atlas* is a theory of what makes systems engineers effective. Generated over a multi-year longitudinal study, *Atlas* provides a general framework of what makes systems engineers effective – from the values that systems engineers generate which are deemed highly beneficial to organizations and projects to the skills used to deliver those values and the ways those skills can be generated. This webinar will explain the overarching *Atlas* theory and its various components. Then, findings that illustrate where and how healthcare systems engineers may differ from systems engineers in aerospace and defense will be provided. Dr. Hutchison will explain how individuals can use this information to better understand their own abilities and map options for a future career.

About Our Speaker

Dr. Nicole Hutchison is a Research Engineer at the Systems Engineering Research Center (SERC). Her primary work through the SERC includes the Helix project; she has served on the project for 4 years and has recently become the Principal Investigator. She was a member of the BKCASE research team from 2009-2014 and now serves as the Editor for Healthcare for the Systems Engineering Body of Knowledge. Before joining Stevens, she spent 5 years working for Analytic Services, supporting the US Departments of Defense, Homeland Security, Health and Human Services, and Justice. She has helped to plan and conduct exercises in Emergency Management, helped run the Louisiana Family Assistance Center following Hurricanes Katrina and Rita, and served 10 years in emergency medicine. She holds a PhD in systems engineering from Stevens as well as a master's degree in Biohazardous Threat Agents and Emerging Infectious Disease from Georgetown University as well as her INCOSE CSEP.
