WORLDWIDE DIRECTORY OF

Systems Engineering and Industrial Engineering Academic Programs

INCOSE

SYSTEMS ENGINEERING Research Center
March 1, 2015

Dear Colleagues,

The International Council on Systems Engineering (INCOSE) and the Systems Engineering Research Center (SERC) at Stevens Institute of Technology have developed this directory as a resource for the industrial and systems engineering community.

We hope it is valuable to you. It is our intent to do this at least annually. Please feel free to send any updates or corrections in this directory to: ISEDirectory@stevens.edu.

Sincerely,

INTERNATIONAL COUNCIL ON SYSTEMS ENGINEERING (INCOSE)  
SYSTEMS ENGINEERING RESEARCH CENTER (SERC)

Introduction

The information herein was primarily drawn from university websites. For each university, it shows the name and address of that university, what degrees that university offers (e.g., a B.S. in Systems Engineering or a Ph.D. in Industrial Engineering), the academic unit that offers those degrees, the head of the academic unit offering those degrees, and a URL where more information can be found.

This is the first edition of the directory, and although it went through several iterations to improve accuracy, there are undoubtedly mistakes and omissions. We welcome your help in correcting any errors in any of the information as well as letting us know about programs we have inadvertently omitted. We will update the directory periodically, but at least annually, so it becomes ever more valuable to the community.

There were some challenges in deciding which programs to include because there are so many variations in how universities call their systems and industrial engineering programs, especially when looking across so many countries. We tried to keep things simple, especially for this first edition. With a few exceptions, we included only programs with the title “Systems Engineering”, “Industrial Engineering”, or those with another field added on, such as “Operations Research and Systems Engineering”. Generally, we did not include restricted systems or industrial engineering programs, such as “Computer Systems Engineering”.
