

Celebrating Women

**Shamsnaz Virani, EWLSE Lead
Worcester Polytechnic Institute**

Celebrating Women Strategic Objectives

- To demonstrate and emphasize the role of women in systems engineering leadership within INCOSE and beyond
- To communicate and identify ways to celebrate success stories in empowering women as leaders in systems engineering
- To recognize key advocates and supporters of EWLSE goals
- To provide information on, encourage, and support the application of women for systems engineering leadership recognition and awards for which they are qualified, both within and outside of INCOSE
- To encourage and support women who are interested and motivated to pursue engineering, systems engineering, and leadership competencies (knowledge, skills, abilities, attitude, behaviors)

Celebrating Women Strategic Initiatives

- Publish works that showcase women that have been successful leaders in engineering and systems engineering around the globe in industry, government, and academia, in INCOSE sponsored newsletter, etc., and in other external publications
- Document and share EWLSE related success stories on the EWLSE website and through other communication venues
- Establish a new award for key advocates and supporters of EWLSE goals; define the criteria, establish the selection process and frequency of the award, and determine the type of award
- Identify and support qualified applicants in support of EWLSE goals for the INCOSE Pioneer Award, Founder Award, Outstanding Contribution and Service Awards, Leadership Institute, etc.
- Establish grants for education, training, and research for supporting women in engineering, systems engineering, and leadership
