

An Introduction to Common Criteria for Information Assurance Security Evaluation

Explore how the information security and assurance of your product could be evaluated for conformance toward Common Criteria Evaluation and Validation Scheme (CCEVS), including the initial steps to conform to certain Evaluation Assurance Levels and how those steps result in an approved National Information Assurance Partnership (NIAP) certified product.

Craig Lynner

Senior Systems Engineer, Information Assurance, Rockwell Collins

18-Aug-2010, 12:00-1:00 PM CT
