

## A Chapter Town Meeting

Presented by Members of the San Francisco Bay Area Chapter

This month it is your opportunity to provide your input about what you would like to see as our chapter focus. The interactive town meeting format will pose a number of questions, and leave plenty of time for you to ask your own questions and raise any issues you care to address as well. Some of the questions we plan to address include: -- What topics would you like to hear talks on at future meetings?

(We welcome topic ideas, and we also welcome suggestions for names of specific speakers to address topics of interest) -- Do you have any interest in more tutorials? If so, what tutorial topics would you like to see?.

- What local activities supporting INCOSE Working Groups might there be interest in starting? Participation in Working Group activities provides one of the best avenues for learning within INCOSE. Having local co-workers on a Working Group means that we can use local, face-to-face collaboration to help keep our enthusiasm up for Working Group participation, and perhaps harness more local talent when you need help on a Working Group project. exciting opportunities for you to become involved with the development of new INCOSE products

- Is there a process in your project's lifecycle that needs rework? Perhaps it's an item that would be of broad interest and would make a good monthly discussion topic.
- Care to share some lessons learned? In the spirit of continuous improvement, hard-earned lessons are enjoyed by grateful audiences.
- How do you manage meeting action items? How are lessons learned archived and made retrievable?
- Discuss ideas for how we can encourage students to formally study system engineering, or how we can help system engineering students
