

Web and eMail Status

Status of New Chapter
Web Site and New
eMail List Server

Danny Hahn
July 10, 2007

eMail List Server Background

- Used “ezmlm” on banyantrees.org until the ISP went bankrupt. Domain administrator was not able to salvage the chapter mailing list. Last use was Nov 2006.
- Reverted to manual cut and paste of addresses from a November 2006 list previously retrieved from “ezmlm”. (~150 addresses)

eMail Current Status

- List server now hosted on incose.org server
- Users can add or delete themselves
- Compared Bay Area Chapter active membership rolls with current mailing list and added the additional names to eMail list server
- eMail list now contains ~258 addresses. Not all are INCOSE members but potential members and interested parties.

Chapter Web Site Background

- Web site on incose.org not updated since 2004. Many links broken.
- In Sep 2005, Banyantrees.org offered free web site for two years and initial training for setup.
- ISP went bankrupt and web site moved to new ISP.
- Currently Banyantrees.org is down for an unknown duration and an unknown reason.

Web Site Status

- Work started reviving the original web site on incose.org. There is about 25 MB containing ~ 1600 files of SFBAC news and data from the 1990's and early 2000's.
- Attempting to retrieve/reconstruct the last 2 years of data from banyantrees.org site. Much of this was created and edited on-line with banyantrees tools.
