Certification preparation tops list of expert tutorials
Professional development a priority at this year's international
conference on systems engineering

Systems engineers build capacity and earn credits toward re-certification

The International Council on Systems Engineering (INCOSE), the world's authority on Systems Engineering, shares the best of the profession during this year's 21st annual International Symposium in Denver, June 20-23, 2011.

Fourteen experts from the USA, Europe and Asia will offer 16 tutorials on subjects ranging from how to reduce the risk of cost and schedule overruns, to gaining stakeholder buy-in. A special 2-day tutorial will help those wishing to prepare for the systems engineering certification examination. Certification is just one way that systems engineers can manifest their professional commitment.

Tutorials offered during the conference permit new and seasoned engineers to build their professional capacity. Certified systems engineers are able to earn continuing education credits toward recertification.

About INCOSE:

The International Council on Systems Engineering (INCOSE) is a not-for-profit membership organization founded to develop and disseminate the interdisciplinary principles and practices that enable the realization of successful systems. INCOSE's mission is to share, promote, and advance the best of systems engineering from across the globe for the benefit of humanity and the planet. INCOSE has grown significantly since its formation in 1990. Today, there are over eight thousand members representing a broad spectrum – from student to senior practitioner, from technical engineer to program and corporate management, from science and engineering to business development. Over 50 chapters have been established worldwide and 60 firms are active members of the Corporate Advisory Board. Additional information is available on our public website, www.incose.org.
