

Celebrating Women

**Lisa Hoverman, EWLSE Lead
HSMC**

Celebrating Women Strategic Objectives

- To demonstrate and emphasize the role of women in systems engineering leadership within INCOSE and beyond
- To communicate and identify ways to celebrate success stories in empowering women as leaders in systems engineering
- To recognize key advocates and supporters of EWLSE goals
- To provide information on, encourage, and support the application of women for systems engineering leadership recognition and awards for which they are qualified, both within and outside of INCOSE
- To encourage and support women who are interested and motivated to pursue engineering, systems engineering, and leadership competencies (knowledge, skills, abilities, attitude, behaviors)

Celebrating Women Strategic Initiatives

- Promote the publication of systems work by women around the globe in industry, government, and academia, in INCOSE publications, highlighting these on the EWLSE website.
- Showcase women that have been successful leaders in engineering and systems engineering in the INCOSE member newsletter, on social media and/or through other internal and/or external publications
- Document and share EWLSE success stories on the EWLSE website in the INCOSE sponsored newsletter and through other communication venues
- Establish a new best paper award for diversity related research; establish criteria and work with INCOSE through approval process.
- Communicate about and support qualified applicants for the INCOSE Pioneer Award, Founder Award, Outstanding Contribution and Service Awards, Leadership Institute, etc.
