

CHARLESTON, SC LOWCOUNTRY CHAPTER

The Charleston Lowcountry Chapter of INCOSE invites members and guests to attend our virtual meetings.

Join us for networking opportunities and presentations on Systems Engineering.

AUGUST 2020

Saturday, 01 August (0800 – 1200):

INCOSE Lowcountry Chapter

SEMINAR:

MBSE 2.0

by: Mr. Zane Scott, *Vitech Corporation*

Seminar:

The intersection of complexity, technology, social evolutions and an ever-shrinking globe are combining to present humanity with challenges that cry out for system solutions. Systems engineering cannot afford to miss these challenges due to disjoint, stove-piped approaches. The time for robust solutions born of models nuanced and framed in a proven systems metamodel is NOW! This tutorial will address how we can meet these challenges today using sound, fundamental engineering leveraged by the cutting-edge transdisciplinary use of a robust, proven system metamodel.

Speaker:

Mr. Scott is the VP for Professional Services at Vitech Corporation. For the past 25 years, Zane has built a skill set which enables him to provide insight and guidance to individuals and companies as they improve organizational processes and methodologies across their organizations. Zane has also taught systems engineering methodology in the practical process context in a variety of settings. Zane is a frequent presenter, teacher and blogger and, with his co-author Dave Waldon, was the winner of a Best Paper Award at 2016 IS. With an academic and professional background in Economics and Law, he offers some unique perspectives on the SE world.
