Abstract

We live in an era of nearly unlimited technology, possess the ability to alter matter to virtually any purpose, routinely play with the building blocks of life itself, and deploy systems that not only span our planet but extend well into space around us. Leveraging the power of the mind at critical points is a hallmark of every great innovator and innovation culture throughout history. Step back from the standards, tools and “TPS Cover Sheets” for a bit and join us for an entertaining and enlightening exploration of mind in design!
