

Cleveland Clinic Tour

The 9th Great Lake Regional Conference team is proud to announce a special guided tour to Cleveland Clinic. The tour provides a closer look at the internal workings of a care facility in terms of care components, functions and strategies to respond to the needs of the sick and critically ill. The tour consists of 3 segments – the Emergency department, Ebola Treatment Center and the Cleveland Clinic Data center. The 3 segments provides 3 facets of the current health industry –

- **Emergency Department** – Learn about the processes and interworking with departments from patient stratification, diagnosis, treatment and patient transfer efficient, effective every decision counts, availability of physician and labs counts, and every passing minute impacts the patient outcome
- **Ebola Treatment Center** – Learn about long term monitoring and preventive measures to protect population in wake of an outbreak
- **Cleveland Clinic Data Center** – Learn about state of the art data center serving the care community with data access and storage needs while protecting life saving patient data from hackers.
