

Agile Systems and Systems Engineering

INCOSE Chapter Meeting

International Council on Systems Engineering • Cleveland-Northern Ohio Chapter

Tuesday
May
24th
2016

Member Meeting • All Welcome

Who: INCOSE Cleveland-Northern Ohio Chapter
What: Agile Systems and Processes 101: Necessary and Sufficient Fundamental Architecture

When: Tuesday, May 24, 2016, 5:30 PM

Where: The Hope Room
Orange Branch of the Cuyahoga County Library
31975 Chagrin Boulevard
Pepper Pike, Ohio 44124

Speaker: Rick Dove of the INCOSE Agile Systems and Systems Engineering Working Group (pre-recorded webinar with group discussion following the presentation)

Registration Requested: See Eventbrite link in email or at <http://www.incose.org/cleveland/>

Description: Agility is enabled and maintained by a fundamentally necessary and sufficient common architecture in systems of all kinds; from agile development and deployment, to the agile systems and products that are deployed. This presentation focuses on that common architecture, and how it enables both reactive resilience and proactive innovation. Several case studies from different industries are examined, as are examples from the natural world.

About the Presenter: The author and presenter is Rick Dove, Chair of the INCOSE Agile Systems and Systems Engineering Working Group, Adjunct Professor at Stevens Institute of Technology in the School of Systems and Enterprises, and CEO of Paradigm Shift International. He co-chaired the 1991 industry-led 21st Century Manufacturing Enterprise Strategy project conducted at Lehigh University that identified **agility** as a principle competitive issue.

*The meeting is **free** and **open** to the public. Please feel free to bring dinner to the event.*
