Here are how the three works fit together for the discussion:

- **Revolt of the Engineers:** Due to the historical repression of social responsibility by businesses, many engineers have stopped acting upon how their work impacts the society-at-large.
- **Influencer:** This modern behavioral science approach could be used by a Community of Systems Engineers to regain their social identities.
- **Vision 2025:** Here is what could be achieved if the Community of Systems Engineers is successful in crossing the chasm.

*Note: You don't have to read the books to attend the discussion, although it is preferred*

**About the Presenters:** Katie Trase is the President of the chapter. Carl Dister is the Past-President.
