

# Joint INCOSE Working Group Webinar Series

13 June 2018: Transportation Working Group

## Applying Scrum Methods in Intelligent Transportation Systems (ITS) Projects

Jesse Glazer  
FHWA

Barbara Staples  
Noblis

Blake Christie  
Retired

# Joint INCOSE Working Group Webinar Series

## ***Webinar Plan:***

- Regular webinars at fixed, predictable days & time
- Organized by the following INCOSE Working Groups (alphabetical order):
  - Automotive Working Group (AWG)
  - Critical Infrastructure Protection and Recovery (CIPR)
  - Infrastructure Working Group (IWG)
  - **Transportation Working Group (TWG)**
- Round robin approach
- Monthly basis, usually second Wednesday @ 11AM ET / 8AM PT
- One hour duration: ca. 45 min presentation, 10-15 min Q/A
- Webinars recorded and uploaded to INCOSE CONNECT & INCOSE TWG YouTube

# Next Webinar (July 18 2018): A System of Systems Approach to Automotive Challenges

**SAE**  
INTERNATIONAL

**WCX** WORLD CONGRESS EXPERIENCE

APRIL 10-12, 2018 • COBO CENTER • DETROIT, MICHIGAN  
sae.org/wcx

**A System of Systems Approach to Automotive Challenges**

Oliver Hoehne, WSP USA & Gary Rushton, General Motors

**WCX** WORLD CONGRESS EXPERIENCE

**AUTOMOTIVE CHALLENGES**  
ADVANCING TECHNOLOGIES POSE NEW CHALLENGES

- Autonomous Vehicles
- Connected Vehicles
- Electric Vehicles
- Smart Cities
- Urbanization / Sharing Economy

Source: <https://insights.globals.pec.com/article/2226/r-evolutionary-road-driving-toward-connected-automation>

SAE INTERNATIONAL

**WCX** WORLD CONGRESS EXPERIENCE

**AUTOMOTIVE CHALLENGES**  
ENGINEERING OF VEHICLES IN LARGER SoS CONTEXT

- Vehicle to Vehicle (V2V)
- Vehicle to Infrastructure (V2I)
- Vehicle to Grid (V2G)
- Vehicle to Everything (V2X)

**WHAT IS ...  
SYSTEM OF SYSTEMS ENGINEERING**

**AND ...  
WHAT DOES IT MEAN TO ME?**

Source: [https://ec.europa.eu/jrc/sites/jrcsh/files/ES\\_InteropBroch\\_0713\\_v9%5B3%5D.pdf](https://ec.europa.eu/jrc/sites/jrcsh/files/ES_InteropBroch_0713_v9%5B3%5D.pdf)

SAE INTERNATIONAL

## Content:

- Discusses automotive challenges the industry is currently facing
- Provides an introduction into System of Systems Engineering (SoSE)
- Provides examples and case studies of successful SoSE
- Makes recommendations on how to address the automotive challenges applying SoSE

Joint INCOSE Working Group Webinar Series

13 June 2018: Transportation Working Group

**Applying Scrum Methods in  
Intelligent Transportation Systems (ITS) Projects**

Jesse Glazer  
FHWA

Barbara Staples  
Noblis

Blake Christie  
Retired

**To (Presenter): Your Question**

# Using Agile/Scrum Methods for Intelligent Transportation Systems

Prepared for: ▪  
**INCOSE TWG Webinar**  
June 13, 2018

Presented by:

***Jesse Glazer***  
*ITS Engineer*  
*USDOT*

***Barbara Staples***  
***Principal***  
***Noblis***

# ***Presentation Topics:***

**Jesse:**

- **What is “ITS”?**
- **How has ITS evolved? What’s in the future?**
- **What is the role of Systems Engineering?**

**Barbara:**

- **Why did USDOT develop the report?**
- **Why is it important to deployers?**
- **What’s in the new USDOT Report?**

# ***What is “ITS”?...***

- **Short Answer = “Technology in Transportation”**
- **USDOT Definition =**  
***“ITS means electronics, communication, or information processing used ... to improve efficiency or safety of a surface transportation system.”*** (23CFR940.3)  
**(Excludes boats, planes & most rail.)**
- **Federal regs apply to federally-funded projects**
- **ITS is heavily dependent upon “IT” resources**

# Evolution of ITS

(1968 → Now)

# ***“Transportation Technology”*** **is >100 years old!**

# 1970's – Freeway Traffic Management

**Traffic Detection  
“loops”**

**Electronic  
Message  
Signs**

**Ramp  
Meters**

# 1980's – *Arterial* Traffic Management

# 1990's – Traffic Management Centers

# 2000's – “Smart Bus” Systems

**Traffic Signal Priority**

Route  
Destination  
Display

**GPS &  
Vehicle ID**

**Automated  
Fare Collection  
and Passenger  
Counting**

Smart Card Reader

Silent Alarm

Driver  
Information Display

Vehicle  
Diagnostics

# 2000's – Traveler Information

# 2010's – Electronic Tolling & HOT Lanes

# 2010's – Mobile Devices

## Traffic & Navigation

## Parking Info & Guidance

## Ride-Hailing & Carpooling

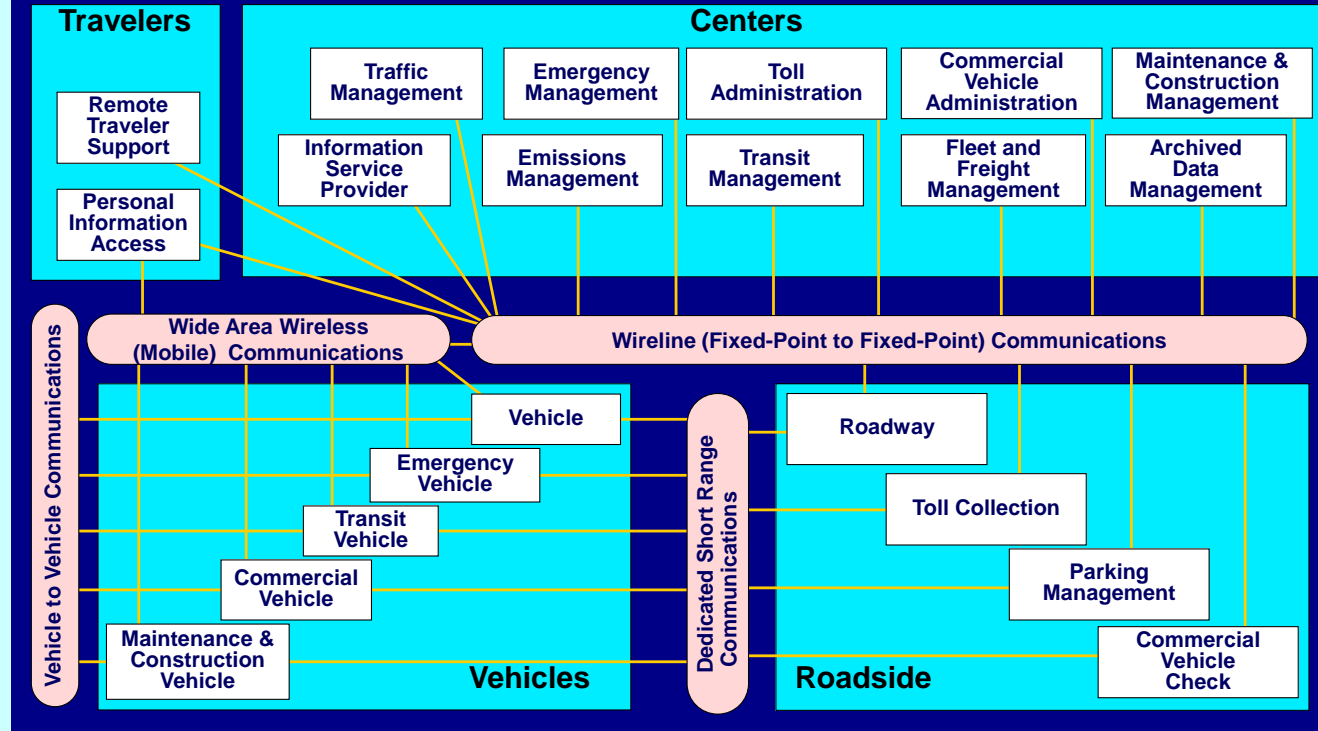

**Meanwhile, ...  
at the “institutional” level...**

**Mid-1990s:**

# National ITS Architecture

- Created by USDOT
- Goal: Define a standard, national, interoperable, ITS framework
- Guideline for future transportation systems
- Built upon S.E. concepts & terminology

# **Late 1990's – ITS Arch. & SE “Rule”**

- **Codified in: 23 CFR 940**
- **Defined ITS and ITS Projects (940.3)**
- **Required:**
  - **Regional ITS Architectures in all Urban Areas (940.9)**
  - **“Systems Engr. Analysis” for all ITS projects (940.11)**
- **Defined S.E. concepts and terminology; still widely used today.**
- **(Drew heavily on aerospace & I.T. concepts, terminology, and people.)**

# High-Risk ITS Projects Must use S.E. Process

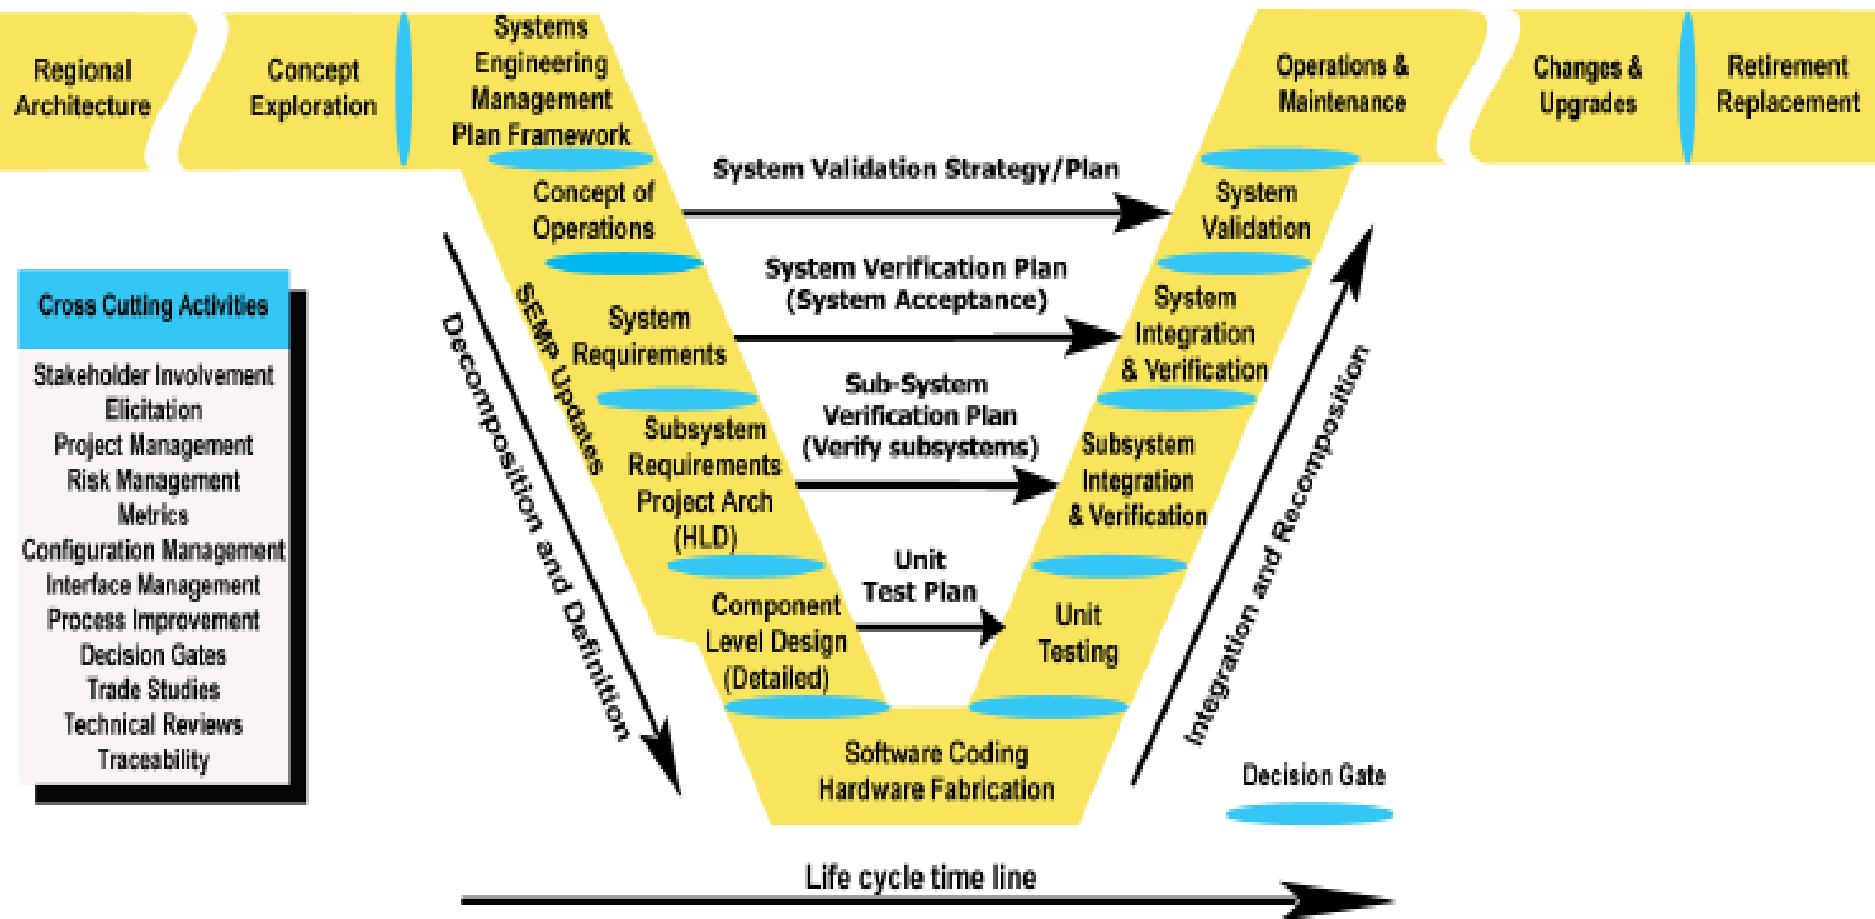

Figure 1-2 ITS Project Life cycle Phases and the Life cycle Tasks in this Guidebook

# Jesse's Observations...

## **ITS Projects are increasingly complex:**

- Multi-agency, multi-modal, multi-purpose
- More people “in the control loop”
- Requirements much less foreseeable.

## **Less hardware, more software:**

- SW development difficult to manage
- SW requires a lot of maintenance
- Ever-changing security threats

**→ Need more flexible development tools!**

# What's the Future of ITS?

# Self-Driving (“Autonomous”) Vehicles

**(under private-sector leadership)**

# ***Vehicles will also be “Connected”*** **(USDOT leadership)**

**... connected to each other on *freeways*:**

***... and on surface streets (“V2V”) ...***

**... and connected to roadway (“V2I”)**

***... and to peds, bikes, etc. (V2X)***

**Vehicles must also cooperate**

# Jesse's Prediction for "ITS in 2068"

## Automated, Connected, Cooperating, Electric Vehicles

- *No traffic congestion*
- *No crashes*
- *No air pollution/GHG*
- *No driving stress*
- *Mobility for all*

# New USDOT Report ...

## Applying Scrum Methods to ITS Projects

[www.its.dot.gov/index.htm](http://www.its.dot.gov/index.htm)

**Final Report — August 2017**

**Publication Number: FHWA-JPO-17-508**

<https://rosap.ntl.bts.gov/view/dot/32681>

# Report Development Team

**USDOT** – Kingsley Azubike, Ed Fok, Jesse Glazer

**Noblis** – Barbara Staples, Blake Christie, Dawn Hardesty, Taylor Deurbrouck, Josh Seder

**ConSysTec** – Manny Insignares, Patrick Chan

-----

Also thanks to TWG for 2016 “Agile in ITS” webinar:  
Simon Smith, Phyllis Marbach, Jean Souza, Jennifer Russell.

# Barbara Staples will describe the Report

## Joint INCOSE Working Group Webinar Series

13 June 2018: Transportation Working Group

### Applying Scrum Methods in Intelligent Transportation Systems (ITS) Projects

Jesse Glazer  
FHWA

Barbara Staples  
Noblis

Blake Christie  
Retired

To (Presenter): Your Question

# Purpose of Presentation

- Introduce *Applying Scrum Methods to ITS Projects*
  - When and how to use Scrum methods in Systems Engineering
  - Why Important to you and deployers

# FHWA Initiative

- **Why did FHWA develop the document?**

Constituents asking about using agile

- **Why important to you and deployers?**

Scrum being used and likely to continue

Combine Scrum with systems engineering within 23 CFR 940.11

Consistent application regarding 23 CFR 940.11

Share information with State/local transportation agencies

# Compatibility with Federal Regulations

- Applying Scrum Methods within the Vee **is consistent with** FHWA SE guidebooks for ITS projects
  - [Systems Engineering Guidebook for Intelligent Transportation Systems, Version 3.0](#)
  - [Systems Engineering for Intelligent Transportation Systems: An Introduction for Transportation Professionals](#)
- The Vee Model (recommended by the guidebooks) with Agile development are compatible with 23 CFR 940.11 – when used properly
  - The Vee Model is compatible with 23 CFR 940.11
  - Agile (Scrum) is compatible with 23 CFR 940.11 when used within a proven Vee Model context

# Intended Audience & Warning

- Two primary audiences
  - State and local transportation agencies
  - FHWA Division Office staff
- Decision-makers within these two groups
- Contractors/System integrators supporting State/local agencies

Those unfamiliar with SE or Agile methods should consult appropriate resources before proceeding

Source: Noblis 2017

# Two Key Take-Aways

## 1. Can I use Scrum with traditional systems engineering?

Project suited to consider use of Agile (or Scrum) include:

- Client vision is incomplete and needs fleshing out
- Upgrade to existing systems is well understood
- New human interfaces
- Web sites
- Functionality that can be delivered incrementally

Project not suited to use Agile (or Scrum) include:

- Safety critical or safety of life features/functions
- Long-term maintenance and thoroughly documented project design decisions required legally
- Integration of disparate systems

Source: ThinkStock

# Two Key Take-Aways (continued)

2. Several challenges need to be addressed by those seeking to use Agile methods (or Scrum)
  - Consider the skill set, staff knowledge, and resources required
  - Consider the contracting needs and agency's procurement regulations
  - Agile is new to ITS community; implementation still evolving

Source: ThinkStock

# What are the benefits of combining SE and Scrum?

- Can provide a holistic and cost-effective approach
- SE provides set of requirements for the overall system and allows for flexibility within the Scrum method.
- SE brings the comprehensive documentation needed for safety critical and maintaining systems
- Requirements developed in SE portion improves communication between design/implementation and test teams

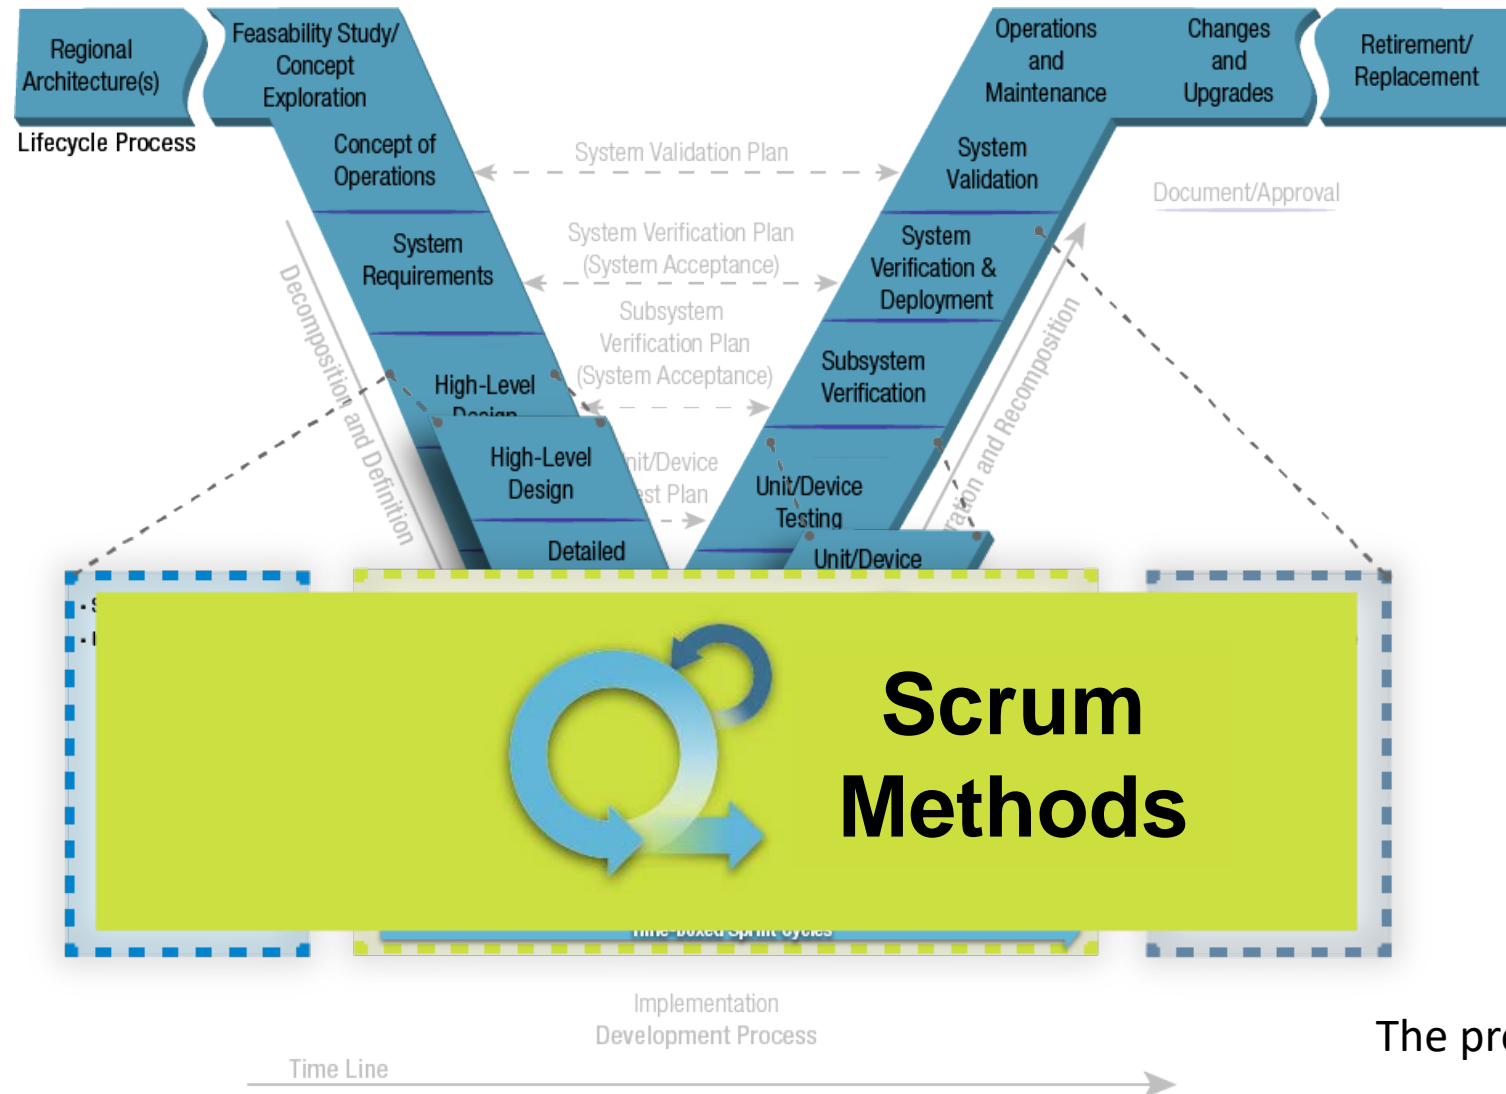

Source: ThinkStock

# New USDOT Paper on Applying Scrum within System Engineering

- What this document covers:
  - Using Scrum development as complement to SE
  - Introduces Scrum
  - Monitoring and Controlling quality when using Scrum
  - Common benefits, risks and lessons learned

# Combining Scrum and Systems Engineering

The process in this figure is fully described in Section 4

# How to use this document

- State and Local Agency
  - Practitioners read Executive Summary and Sections 1, 2, 3, 4, 6 and 8
  - Decision makers read Executive Summary
- FHWA Division Staff
  - Staff read Executive Summary and Sections 1, 2, 3, 5, 6, 7, and 9
  - Decision makers read Executive Summary
- State or Local Agency Consultants/Contractors
  - Read the **ENTIRE** document

# Table of Contents

<b>1</b>	<b>Introduction</b>	Provides the purpose, scope, and background.
<b>2</b>	<b>Fundamentals of SE, Scrum Development, and the Vee Model</b>	Summarizes fundamentals of SE and the Vee Model; describes the Scrum methodology; and introduces the concept of combining each.
<b>3</b>	<b>Getting Started - Why and When to Use Agile</b>	Guides PMs through decision making process for when and where to use Agile (Scrum Method).
<b>4</b>	<b>How Agile (Scrum method) fits into the Vee Model –</b>	Explains how Scrum and the Vee model relate. Use this section to consider how to fit the Scrum method into the overall Vee Model.
<b>5</b>	<b>Cross-Cutting Activities</b>	Explains activities that will cut across all SE and Agile methods that should be considered to successfully manage system development.

# Table of Contents (continued)

<b>6</b>	<b>Roles and Responsibilities when using the Scrum Method</b>	Explains the roles and responsibilities in a combined Scrum and Vee model project.
<b>7</b>	<b>Considerations for Federal Assistance When Using Agile</b>	Identifies when and how using Agile methods is not in conflict with the requirements of 23 CFR 940.11.
<b>8</b>	<b>Procurement Options/Contracting</b>	Provides information to help PMs develop procurement and contracting specifications for projects where Agile is a possible option.
<b>9</b>	<b>Summary and Next Steps</b>	Provides top 12 suggestions for using a combined approach, and provides potential next steps for improving this document.
