

30th Annual **INCOSE**
international symposium

Virtual Event
July 20 - 22, 2020

Ways to Record

There are many ways to record your presentation for later playback to an online conference, or later uploading to YouTube or another video storage system. Here are the three options covered here:

1. Recording with PowerPoint
2. Recording with Zoom
3. Recording with Open Broadcaster System (OBS)

Recording with PowerPoint

Here is a nice video, by a Microsoft employee, on how to record a presentation using PowerPoint:

<https://www.youtube.com/watch?v=D8JV3w4TOVw>

Recording with Zoom

Here's a nice video on how to record a presentation using Zoom:

<https://www.youtube.com/watch?v=WmMSXOQVQs4>

Recording with Open Broadcaster System (OBS)

OBS is more complex than PowerPoint or Zoom, but is a wonderful free program that essentially turns your computer into a TV studio. OBS has tremendous flexibility for how you format and build your presentation, from PowerPoint, software demonstrations, even multiple cameras. If you want to give this a try, get OBS from <https://obsproject.com/> and start with this video on how to record a presentation:
