About INCOSE

The International Council on Systems Engineering (INCOSE) is a not-for-profit membership organization that promotes international collaboration in systems engineering practice, education, and research.

INCOSE's mission is to "address complex societal and technical challenges by enabling, promoting and advancing systems engineering and systems approaches." Founded in 1990, INCOSE has more than 70 chapters and over 27,000 members and associates worldwide.

For additional information about INCOSE visit www.incose.org.

What is the International Workshop?

INCOSE's International Workshop is the event of the year for systems engineers to contribute to the state of the art.

Unlike INCOSE's annual International Symposium and other conferences, there are no paper, panel, or tutorial presentations. Instead, attendees spend 4 focused days working alongside fellow systems engineers who are there to make a difference. Systems Engineers at all levels and from all backgrounds are encouraged to engage in working sessions, and contribute their knowledge and experience to take the discipline forward.
