

Systems Engineering Certification: Informational Session

A **FREE** 1 Hour Virtual Meeting
Registration Required

Courtney Wright
Program Manager
INCOSE Systems Engineering
Certification Program

Thur June 9, 2022
7:00 – 8:00 PM EDT

Courtney Wright is a Certified Systems Engineering Professional (CSEP) and the Program Manager for INCOSE's Certification Program. She has over twenty years of experience working as an SE, including at NASA, the US Department of Defense, and the Federal Aviation Administration. She enjoys describing everything in her life using systems engineering terminology, much to the dismay of her family and the amusement of her friends. She knows better than to say, "Actually ..." and hasn't yet accepted that "Interestingly ..." is just as bad. She has a bachelor's degree in Mechanical Engineering and a master's in Operations Research.

Session Description. INCOSE Certification is a great way to show employers that you understand systems engineering. Figure out which certification level is right for you now and in the future. Learn how to apply for and maintain certification throughout your career.

Regardless of whether you are just thinking about certification, currently going through the certification process, or are already certified, you will find the information in this session useful.
