

10th Annual Systems Engineering in Healthcare Conference

April 29-May 1, Minneapolis, MN

The “Beyond the System” Track

This year we are introducing a more focused “Beyond the System” track with content tailored to advanced practices which have impacts beyond the engineering of any one system. We feel that these topics can have an especially large and immediate impact to your business results for our MedTech Industry.

The Value of This Track

Systems Engineering can impact more than just requirements, architecture and verification. It can impact the enterprise, the business, and the entire ecosystem. The topics of this track offer methods and lessons learned that can enable you to make big differences in your organization, beyond just the system you are working on.

The Beyond the System Track Content

We are pleased to announce that David Long has agreed to kick-off the Beyond the System track this year. As the former President of INCOSE, current INCOSE Director for Strategic Integration, and President of Blue Holon, David has leadership best practices to share with us. His talk, entitled “Succeeding Beyond the System”, was created for our track and focuses on embracing the socio-technical convergence required to be successful systems engineers in our increasingly complex world.

Examples of other topics that fit in this track include:

- *System of Systems*
- *Product Line Engineering*
- *Reuse Regulatory Strategies*
- *Portfolio & Platform Architecture*
- *Platform Configuration Management*
- *SoS & Interoperability Risk Management*
- *Interoperability*
- *SoS & PLE Standards*
- *Enterprise Systems Engineering*
- *Modularity & Reusability*
- *Platform Change Control*
- *Interoperability Standards & FDA Guidance*

The Call to Action

Do you have interest in topics such as these? Then start making plans now to attend. Check out our conference site for more information: <https://www.incose.org/hwq-conference/>

Do you have any experience in these kinds of topics? Well then, this is a chance to help our community and yourself by sharing your experiences with a presentation and gather ideas from the attendees on similar approaches or lessons learned. Check out even more benefits to presenting here: <https://www.incose.org/hwq-conference/attendees/why-should-you-present>

Our abstract submission site is scheduled to open to the public Dec 15. However, before that we strongly encourage you to suggest your ideas for a presentation to Mike Celentano (our track leader) at: SystemOptimizationSpecialists@yahoo.com
