Hi Lanka

The web login is currently not working. This is because the website was hacked and was down for three weeks. It is now hosted on a temporary server and runs on a limited mode. The website will be redesigned, and hosted on INCOSE server, in few month. In the mean time I can assist you with any particular information you might need. If you need SETE proceedings of the past years I can get them for you.

Cheers

Mahmoud

Dear Mahmoud,

I am a member of SESA and I cannot login to SESA web site.

I tried auto password recovery several times and it does not seem to be working.

I have been having this problem since February 2017 and sent you many emails.

You have reset my password two months ago and it seems to be a temporarily fix.

Appreciate, if you could address this issue at your earliest convenience.

Kind regards,

Lanka
