#### **CONFERENCE HISTORY**

- CSD&M was created in France in 2010 by Prof. KROB Daniel and has been organized every year by the French non-profit organization CESAMES (系思迈系统架构协会 ), with guidance & support of the Dassault Aviation – DCNS – DGA – Thales « Complex Systems Engineering » industrial chair of Ecole Polytechnique;
- CSD&M Asia was created in 2014. After 3 editions in Singapore and thanks to INCOSE, CESAMES shall coorganize the 2020 Edition in Beijing with CSAA (Chinese Society of Aeronautics and Astronautics 中国航空学会), under the precious guidance of Dr. ZHANG Xinguo.

#### **CONFERENCE SCOPE**

As usual, the CSD&M Asia conference is intended to be a KEY MEETING POINT in Asia-Pacifc area for industrial, academic and governmental actors interested in Model-Based Systems Engineering and complex projects management. Each presentation in the conference usually covers 2 types of topics:

- an industrial domain
- a scientific or technical topic

As mentioned, the CSD&M Asia has been successful with important research topics of academies and project topics of industries and governmental agencies. This 4th edition in Beijing will continue to open up to diverse and advanced topics such as defense, aviation, space, nuclear, energy, health, transportation (train, ship and vehicle), electronics, emerging technologies.... So any paper or presentation subject can cover one or multiple topics of the below table:

Industrial Domains	Scientific & Technical Topics	
<ul> <li>Aerospace</li> <li>Automotive</li> <li>Communications &amp; E-services</li> <li>Defense &amp; Security</li> <li>Electronics &amp; Robotics</li> <li>Energy &amp; Environment</li> <li>Healthcare &amp; Welfare services</li> <li>High-Tech</li> <li>Logistics &amp; Supply chain</li> <li>Ship &amp; Transportation</li> <li>Software industry</li> <li>Urban &amp; Public infrastructures</li> </ul>	<ul> <li>Systems fundamentals</li> <li>Systems architecture &amp; Engineering</li> <li>Model-Based Systems Engineering</li> <li>Big-data for industrial applications</li> <li>Systems manufacturing</li> <li>Systems Modeling &amp; Simulation</li> <li>System optimization</li> <li>System project management</li> <li>Systems safety</li> <li>Systems serviceability</li> <li>Systems Technology &amp; Policy</li> </ul>
