

Vision Statement

Dr Quoc Do, B.Eng, M.Eng, PhD
FIEAust, CPEng, IntPE(Aus), KBR Tech Fellow

Our vision is to drive strategic growth within the Asia-Oceania sector, with the aim of doubling our impact within five years. We believe that celebrating cultural diversity and domain diversification is a strength that will fuel our success, fostering an inclusive and innovative Systems Engineering community. Collaboration and knowledge sharing, facilitated through a new regular Sector III Speaker Program, regional conferences, events, and special working groups, will be at the heart of our efforts.

We are committed to recognizing and promoting systems engineering excellence in both industry and academia. This includes bringing the INCOSE IS2026 to Sector III, establishing awards programs at national, regional, and international levels, and introducing academic equivalency and achieving mutual recognition of systems engineering certification programs. Additionally, we aim to raise awareness and improve outreach, as many individuals within our Asia-Oceania region are already practicing systems engineering without realizing it, often due to cultural and language barriers.

Throughout my career, I have contributed to INCOSE's vision and mission of sharing, promoting, and advancing the field of systems engineering. I have held various roles including past President of the INCOSE Australia Chapter, past President of the Systems Engineering Society of Australia, former Associate Director for Technical Review, Founding Chair of the Model-Based Conceptual Design Working Group, and was inducted into the inaugural cohort of the INCOSE Technical Leadership Institute.

In addition, I have made contributions through various conferences, serving as presenter, General Chair of the Systems Engineering Test and Evaluation Conference (SETE 2016), General Chair of the Australian Systems Engineering Workshop (ASEW2015), Technical Chair of the 9th IEEE International Conference on Systems of Systems (SOS2014), and Chair of the Technical Review Committees for the INCOSE IS in 2011 (Denver, US), 2012 (Rome, Italy), 2013 (Philadelphia, US), and 2014 (Las Vegas, NV USA).

Furthermore, as a Principal Consultant at Frazer-Nash Consultancy, ONE KBR Technical Fellow, Fellow and Chartered Systems Engineer recognized by Engineers Australia, I have demonstrated a continued commitment to professional excellence and leadership. I seek to continue my service and dedication to sharing, promoting, and advancing Systems Engineering within our Asia-Oceania region.

Our operating principles are to *"Think global while acting local"* - to do things that matter and deliver value to members here and now, while contributing to long-term strategic advancement for the Systems Engineering discipline globally. In doing so, we build upon Sector III's successes and recognize that *"a system is more than the sum of its parts"* - sharing, collaborating, and uniting will be the soul of our continued success.
