

PUB-103: Journal of Enterprise Transformation Editorial Policy – April 20, 2018

Purpose

This policy describes the purpose of “Journal of Enterprise Transformation” (JET) and the expected overall content, which is the responsibility of the Institute of Industrial and Systems Engineers (IISE) and INCOSE, as well as the role of the publisher.

Applicability

This policy applies to prospective authors for the Journal of Enterprise Transformation and the reviewers and editorial board for this peer-reviewed journal. It also applies to INCOSE members and staff working with the publisher, Taylor & Francis, and the partner organization in publishing JET, the Institute of Industrial and Systems Engineers (IISE).

Definitions

N/A.

Policy Content

This Journal exists to serve the goals of the International Council on Systems Engineering and Institute of Industrial and Systems Engineers:

1. To provide a forum for original articles on trends, new findings, and ongoing research (both theory and application) related to enterprise transformation.
2. To bring together interdisciplinary research in management, industrial and systems engineering, information systems, organizational behavior, political science, economics, etc.
3. To provide a window to the future by publishing advanced thinking around enterprise transformation including:
 - Enterprise change
 - Enterprise architecting
 - Theories of transformation
 - Transformation methodologies
 - Research methods
 - Enterprise modeling and simulation
 - Context-specific case studies of transformation
 - Role of information technology in transformation
 - Enterprise performance measurement

Policy considerations: JET supports these goals by providing a continuing publication of peer-reviewed results from research and development in the area of enterprise transformation. Enterprise transformation is characterized broadly in this context as “solutions that consider the role of organizations, knowledge, information, processes, strategy, and technology. This holistic approach integrates the needs of multiple stakeholders to create value and enable enterprise transformation.”

All submitted manuscripts are subject to initial appraisal by the Editors, and, if found suitable for further consideration, to peer review by independent, anonymous expert referees. All peer review is single blind and submission is online via ScholarOne Manuscripts.

Responsible Position

The INCOSE Associate Director for Publications is responsible for this policy.

Related Policies

PUB-102: “Systems Engineering – The Journal of the International Council on Systems Engineering” is structured similarly but has a different scope and publisher.
