

**Please join us on the next INCOSE Webinar**

---

**When**

Wednesday, 20 March 2024 from 11:00am-12:00pm EST  
(15:00-16:00 UTC)

**Topic**

Enhancing Systems Engineering Through Generative AI  
(GAI)

**Speaker**

Steve Dam

---

## Abstract

Generative AI is known for generating papers and creating code... can it really help systems engineering? SPEC Innovations has applied AI/Natural Language Processing techniques for nearly a decade, including these capabilities to provide quality checking, traceability assistance, and model quality analysis.

For the past two years, SPEC Innovations has been conducting research in generative AI with George Mason University for NASA through a STTR Phase II contract. This research has resulted in an initial implementation of ChatGPT in our Innoslate Clouds (AWS and AWS GovCloud), which enables researchers to explore some of the possible uses of generative AI for systems engineering.

In addition, SPEC Innovations sponsored George Mason University Graduate Students in a Capstone Project in Fall 2023, which continued exploring potential uses of AI4SE. As part of that work, they researched how other tools implemented GAI. We will also explore this comparison.

This presentation will discuss the potential benefits and limitations of AI4SE as applied to modern software tools as digital assistants to the systems engineer. We believe that integrating the AI4SE capabilities into these tools will enable systems engineers to become more productive and valuable to their projects.

## Biography

**Steven Dam** is the President and Founder of the Systems and Proposal Engineering Company (SPEC Innovations). He has been involved with structured analysis, software development, and systems engineering for over 45 years. He has authored four systems engineering-based books, including his most recent, "Real MBSE: Model-Based Systems Engineering Using LML and Innoslate." He has a B.S. and Ph.D. in Physics. He is an INCOSE-certified ESEP and recipient of the INCOSE 2023 Founder's Award. In addition, he was recently made an Associate Fellow of AIAA.

## Become an INCOSE Member!

Whether you are a student, an early-career professional, or a senior member of the systems engineering community, INCOSE provides a membership level appropriate for your participation. [Join us today!](#)

## How to Connect

**Register in advance for this webinar at:**

**[https://incose-org.zoom.us/webinar/register/WN\\_9crBHyANS-qtXiXOFJR-gg](https://incose-org.zoom.us/webinar/register/WN_9crBHyANS-qtXiXOFJR-gg)**

**After registering, you will receive a confirmation email containing information about joining the webinar, including a hyperlink that will activate 30 minutes before the start of the webinar.**

**We recommend attendees join audio using the ZOOM platform audio (Voice over Internet).**

## Notice

Please note that you can now access the webinar using mobile devices. There are 1000 virtual seats available for the webinar. Currently they are available on a first-come, first-served basis.

Zoom can be used to record meetings. By participating in this meeting, you agree that your communications may be monitored or recorded at any time during the meeting.

## Missed the Webinar?

Don't worry, the recording will be made available through the [INCLOSE Professional Development Portal \(PDP\)](#) within two weeks after the air date. The entire catalog of the INCLOSE Webinar series is available through the PDP; use the browsing function and select "Webinar" to view all the previous recordings.

---

Please note you can now receive a Professional Development Unit (PDU) supporting your certification renewal by attending an INCOSE technical webinar. [Click here](#) to learn more about certification renewals and PDUs.
