

Government IP Terms

Conference Proceedings Intellectual Property Terms

USE THIS TYPE WHEN	The paper was created by government employees within official duties, a government entity owns or controls relevant rights, or a government-specific public-release or publication authorization is required.
DO NOT USE THIS TYPE WHEN	The work was created by a government contractor or funded by a government award but the relevant rights are actually owned by the authors or an organization; required public-release approval has not been obtained; or the paper combines rights that cannot accurately be covered by this single type.

How this document is used. This form is completed once per paper and signed by the corresponding author on behalf of all Authors listed on the Paper. The corresponding author should confirm that the Government IP type applies to the entire Paper, review these terms, complete the signature page, and sign the form. The signed form records the Paper, the corresponding author, the applicable Government Entity, the signature date, and the version of these terms accepted.

1. Paper, authors, and government interests covered

These terms apply to the accepted conference paper and any accompanying files submitted for inclusion in the official INCOSE conference proceedings (collectively, the "Paper"). "Authors" means every person listed as an author of the Paper at the time this form is signed. "Government Entity" means the government department, agency, authority, or other public body that owns, controls, or must approve publication rights in the Paper.

The Government IP type applies when the Paper was created by government employees within the scope of their official duties, when a Government Entity owns or controls relevant rights, or when a government-specific release is otherwise required. It should not be selected solely because an Author works for a government contractor, received government funding, or used government facilities if the relevant rights are actually owned or controlled by the Authors or an organization.

2. Copyright status and permission to INCOSE

Copyright status for government works varies by jurisdiction and by the circumstances in which the Paper was created. To the extent copyright or related rights exist and may lawfully be licensed, the applicable Authors or Government Entity retain those rights and grant the International Council on Systems Engineering ("INCOSE") a non-exclusive, fully paid-up, royalty-free, perpetual, worldwide license to use, publish, reproduce, print, display, distribute, transmit, archive, preserve, and otherwise make the Paper available in any media or format.

For any portion of the Paper that is not subject to copyright protection under applicable law, the corresponding author confirms that INCOSE may publish and use that portion without restriction, subject to any required government approvals, notices, security reviews, export controls, or other legal limitations. INCOSE may authorize its publishers, hosting providers, indexing services, preservation services, and affiliated societies to exercise these rights for publication and dissemination of the proceedings.

3. Proceedings, Version of Record, and metadata

INCOSE may publish the Paper as part of official INCOSE conference proceedings, assign an International Standard Serial Number (ISSN) or other publication identifier to the proceedings, and assign a Digital Object Identifier (DOI) or other persistent identifier to the Paper.

INCOSE may register, deposit, distribute, correct, and update bibliographic metadata for the Paper with Crossref and other scholarly indexing, discovery, preservation, and library services. The version published by or on behalf of INCOSE will constitute the official Version of Record.

4. Representations and government approvals

The corresponding author confirms that the Paper has completed all required government, agency, employer, customer, sponsor, security, classification, public-release, export-control, and other approval processes and may lawfully be published under these terms.

The Authors confirm that the Paper is original except for authorized third-party material; has not previously been published as the same Version of Record; does not unlawfully infringe the rights of others; and contains no classified,

controlled, confidential, export-restricted, or otherwise prohibited information. All required permissions for third-party content must be obtained before submission.

5. Credit and moral rights

INCOSE and its affiliated societies will identify the Authors and, where appropriate, the Government Entity when the Paper is published or reused, consistent with customary scholarly publishing practices.

To the extent permitted by applicable law, the Authors and Government Entity waive or agree not to assert moral rights or similar rights that would interfere with the uses authorized by these terms.

6. Claims, notice, and cooperation

If a third party asserts a claim concerning the Paper that, if true, would constitute a breach of the confirmations made through this form, INCOSE will provide reasonable notice to the corresponding author or Government Entity. To the extent permitted by applicable law and regulation, the Authors and Government Entity will reasonably cooperate with INCOSE in responding to or defending the claim.

Nothing in these terms requires a government, Government Entity, or government employee acting in an official capacity to indemnify, hold harmless, defend, or pay attorneys' fees, damages, costs, or expenses except to the extent expressly authorized by applicable law and available appropriations. INCOSE may retain counsel of its choosing at its own expense.

7. Corresponding author confirmation

By signing this form, the corresponding author confirms that they are authorized to act on behalf of every listed Author; that all Authors have reviewed and agreed to these terms; that the Government IP type accurately applies to the entire Paper; that the applicable Government Entity has approved public release and publication; and that all permissions and approvals required for publication have been obtained.

Required copyright notice on the first page of the paper

For a U.S. Government work: "This work was authored by employee(s) of the United States Government and is not subject to copyright protection in the United States. Foreign copyright protection may apply. Permission granted to INCOSE to publish and use."

For a government-owned work that is protected by copyright: "Copyright © [year] by [legal name of government entity]. Permission granted to INCOSE to publish and use."

8. Governing law and questions

These terms are governed by and construed in accordance with the substantive laws of the State of Indiana, without reference to conflict-of-law principles. Questions should be directed to permissions@incose.net before final submission.

INCOSE Publications is no longer able to accommodate exceptions or modifications for Conference Proceedings. All rights must fall under one of the three types provided.

Government IP Form - Paper and Signature

Complete one form per paper. The corresponding author signs and submits this form on behalf of all authors listed on the paper.
