About STC

Model-Based Systems Engineering Services

Industry leader in model-based systems engineering (MBSE). Our team executes systems engineering (SE) activities for government and industry using formalized modeling

Engineering Transformation Services

Consult to government and industry organizations on digital engineering (DE). Services include analyzing current DE maturity, development of a DE roadmap, and up-skilling customer teams

Software and Infrastructure Support

Provide on-site and cloud-based installation, configuration and support services for MBSE and DE tools and environments for our customers

AI-Enabled Systems Engineering Services

Apply artificial intelligence (AI) to accelerate SE workflows, enabling automated model analysis, requirement validation, anomaly detection, and decision support to improve design quality, reduce risk and shorten delivery timelines

300+ EXPERT MBSE ENGINEERS

50+ NEXT-GEN PLATFORMS SUPPORTED

250+ ORGANIZATIONS SUPPORTED

90%+ SECURITY-CLEARED WORKFORCE

Slide 4

MJ1 This slide doesn’t mention training at all

Johnson, Matthew (STC), 2026-10-22T19:34:51.866

Training Services

Live and on-demand MBSE and digital engineering courses from our leading experts

- Practical, real-world training to develop MBSE practitioners
- Live, virtual and on-demand training options
- Customizable course content
- Comprehensive MBSE training
- Courses for all skill levels

Training for All Roles

Stakeholders in every role contribute to the success of digital transformation.

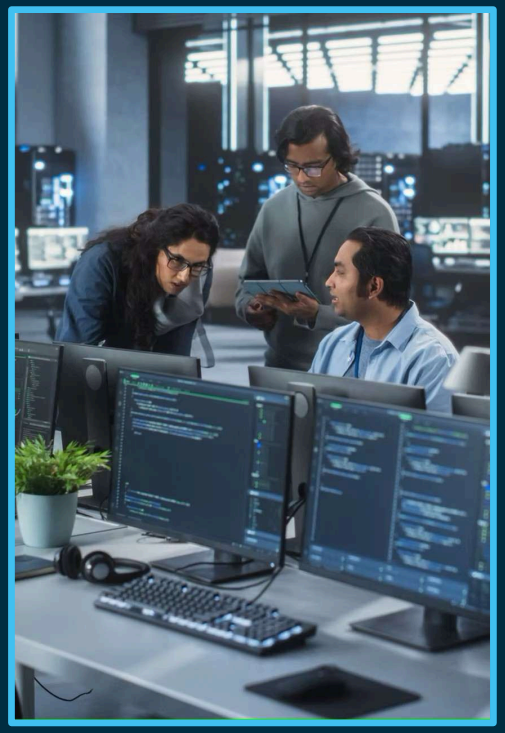

Educated leaders support business development, enable engineering, and break down barriers.

Systems thinkers are at the core of MBSE, SoS architecture, and EA, connecting engineering and leader stakeholders.

Training **engineering stakeholders** improves collaboration, advances culture, and reduces defects.

DE ACADEMY

On-demand virtual training

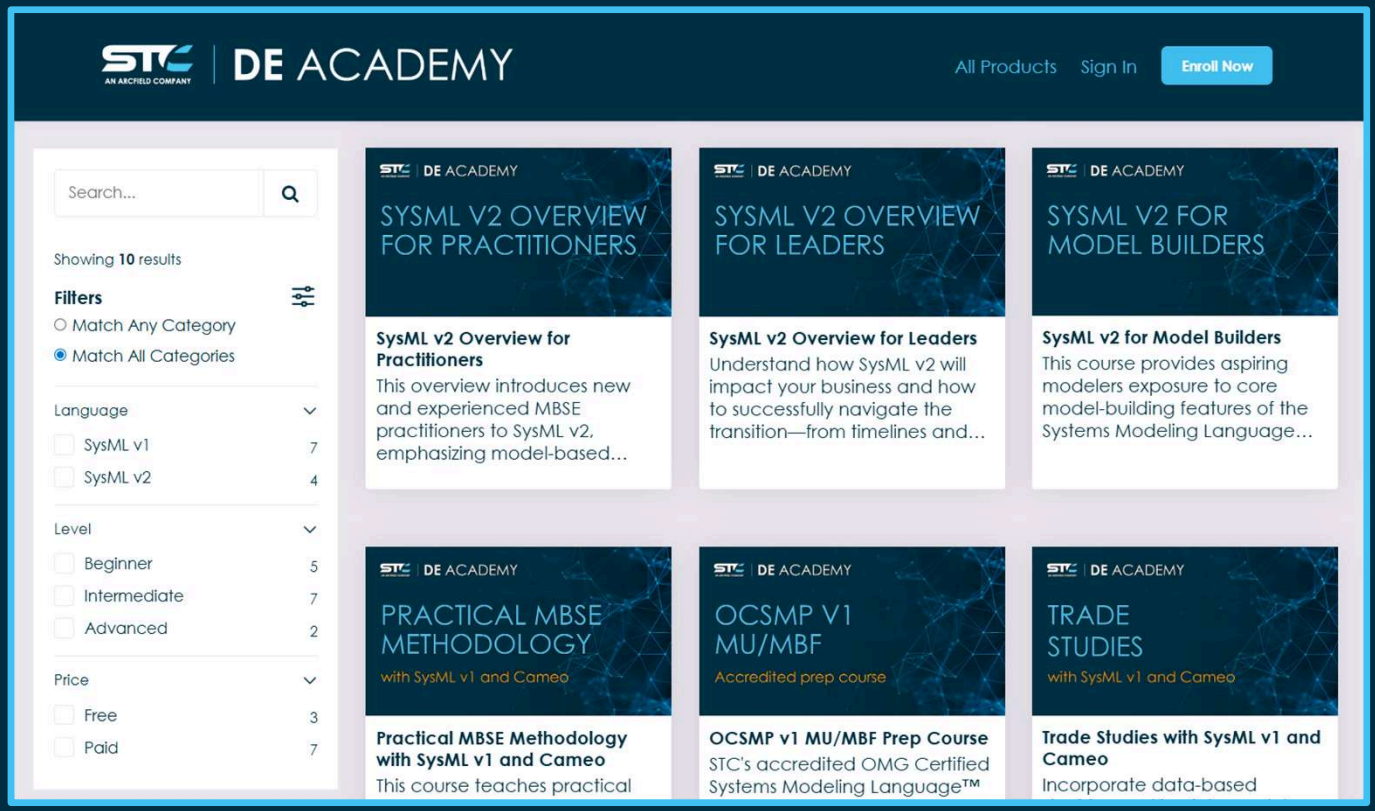

Developed by MBSE service professionals and instructors

© 2026, Strategic Technology Consulting, LLC. Duplication or dissemination of this or related training materials, without written consent, is prohibited.

DE Academy Platform Overview

© 2026, Strategic Technology Consulting, LLC. Duplication or dissemination of this or related training materials, without written consent, is prohibited.

SysML v2 Courses

- Free overviews for practitioners and leaders
  - Easy way to get started for engineers and decision-makers
- SysML v2 for Model Builders
  - Tool-independent, textual and graphical notation
  - "With Cameo" on-demand version coming Nov. 2026
- What's coming in 2027?
  - SysML v2 methodology, certification exam prep., trade studies, expressions, and more
  - More courses for stakeholders, such as readers and reviewers.

Summary

- STC has live and on-demand training services and products.
  - STC releases new courses every 4-6 months.
  - Custom training services are available.

- Multiple methods of acquiring
  - Individual courses or bulk subscription
  - Company purchase order or online payment

- Multiple methods of delivery
  - On-site, group virtual, individual drop-in (coming in 2027)
