Eli Snell VP, Software Solutions

- Eli Snell leads the Software Solutions organization at Proteus Digital Health, responsible for software platform strategy and integration with corporate partners.
- Eli holds a B.S. degree in Computer Engineering and a M.S. degree in Electrical Engineering from California Polytechnic State University, San Luis Obispo.

5th Annual Systems
Engineering in Healthcare
Conference

May 1-2, 2019
Minneapolis, MN

Digital medicines ensure drugs work in the real world

Did I take my drugs today?

How do my drugs affect my daily life?

Can my care team make the drug dose more specific?

Is my drug taking delivering the outcomes I want?

Used by Patients

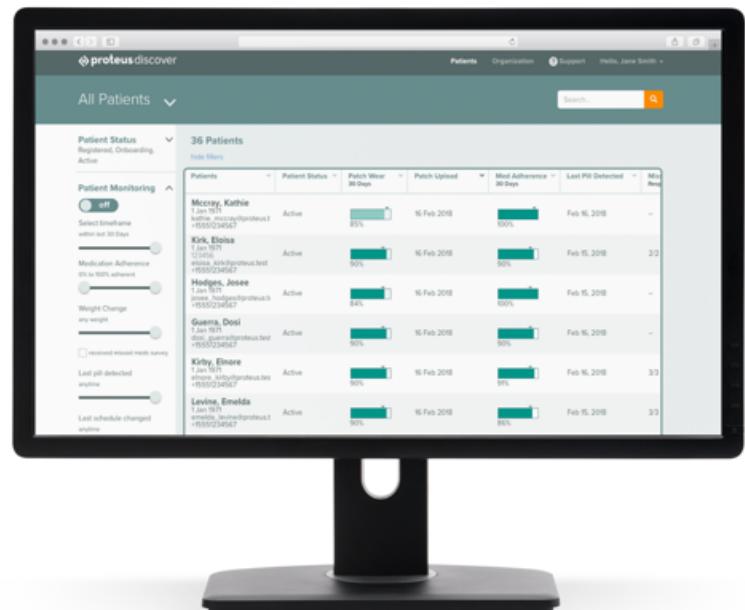

**Digital
Medicines**

**Wearable
Sensor**

**Patient

 **#hwgsec**

Silicon: 0.9mg
Bananas: 5mg
per 100 grams

Copper: 0.02mg
Cashews: 2.2mg
per 100 grams

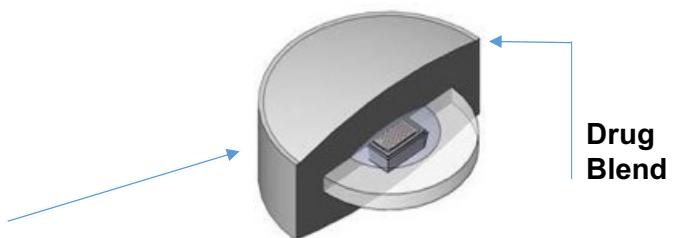

Magnesium: 0.01mg
Halibut: 107mg
per 100 grams

Enabled by a unique ingestible sensor

The world's smallest, safest, global regulator approved medical device

Proteus Ingestible Sensor

Digital Medicine:

- Ingestible sensors enable digital medicines
- No change in size, shape or drug properties

- Cleared by FDA, CFDA, CE Marked in Europe
- Designed to be incorporated into medicines
- Supported by technology and data platforms

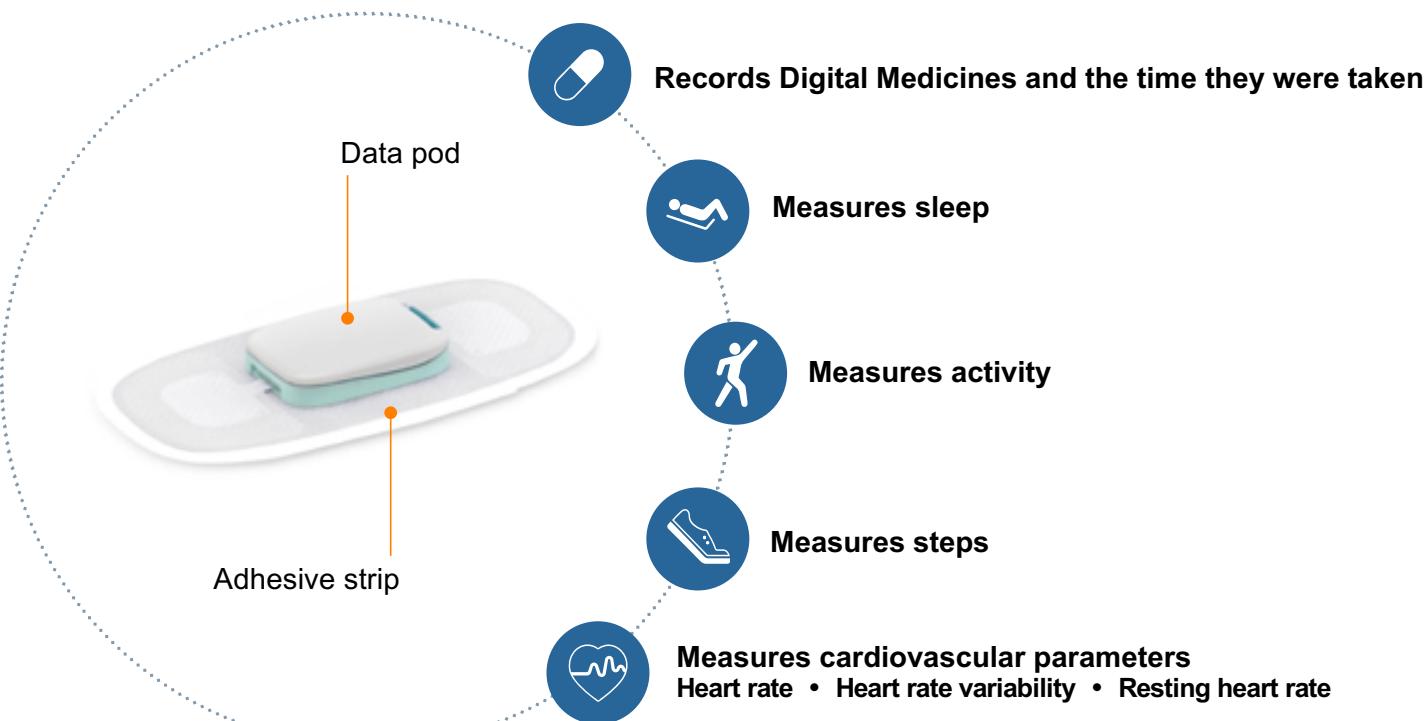

5th Annual Systems
Engineering in Healthcare
Conference

May 1-2, 2019
Minneapolis, MN

Wearable sensor links drug taking to physiologic response

Beyond Digital Medicines, the Proteus Patch automatically captures relevant biometric data

Three stages in our agile journey

Presented in 2018

Scrum Essentials

- Scrum for Teams training for the entire Product organization and other key functions
- Formed new teams, emphasizing cross-functional participation
- Began following scrum best-practices at the team level

Quality System

- Revamped quality system to address compliance gaps and align with agile principles
- Created new Software Development Life Cycle SOP, with cross-functional participation
- Updated tools and infrastructure to support the quality system

Scale

- Developed agile product development framework to coordinate across teams
- Formed “trains” to align similar teams

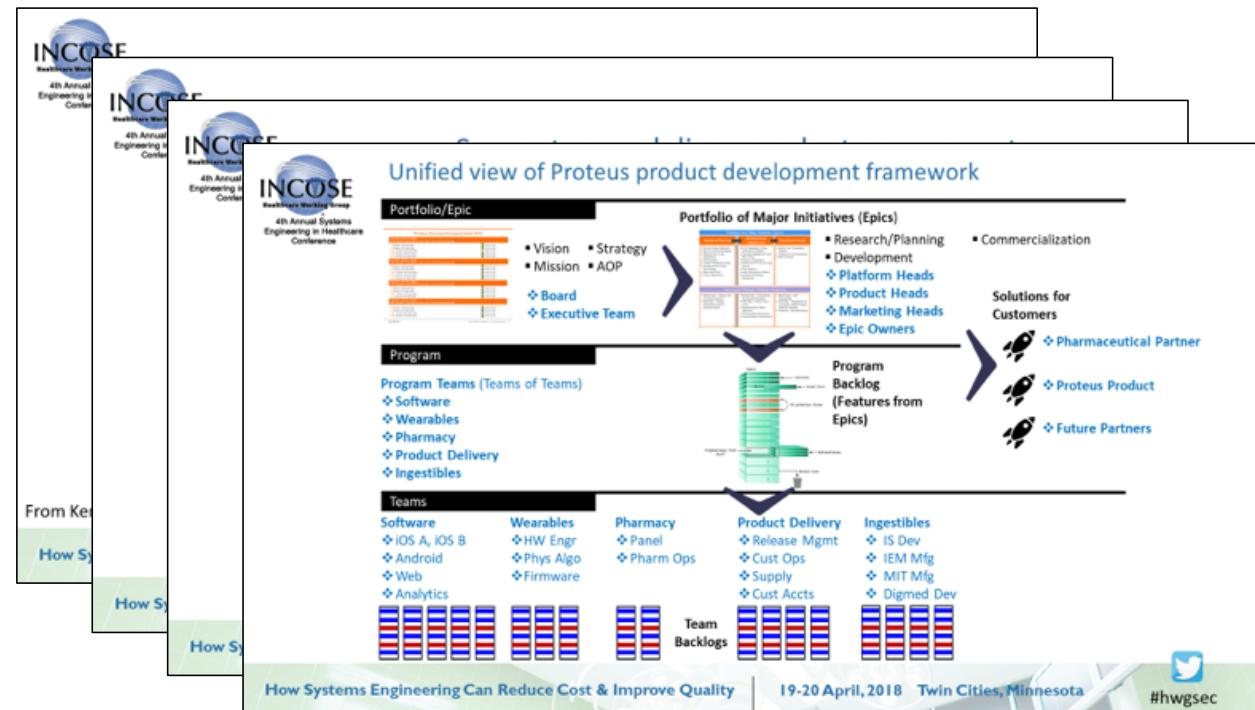

INCOSE
Healthcare Working Group
5th Annual Systems Engineering in Healthcare Conference
May 1-2, 2019
Minneapolis, MN

Scrum essentials and an agile quality system established a strong foundation

Topics covered in-depth at the 4th Annual Systems Engineering in Healthcare Conference in 2018

- Scrum Basics
- SDLC
- Team Structure
- Agile Framework

Three stages in our agile journey

Current
Challenges

Scrum Essentials

- Scrum for Teams training for the entire Product organization and other key functions
- Formed new teams, emphasizing cross-functional participation
- Began following scrum best-practices at the team level

Quality System

- Revamped quality system to address compliance gaps and align with agile principles
- Created new Software Development Life Cycle SOP, with cross-functional participation
- Updated tools and infrastructure to support the quality system

Scale

- System architecture to support multiple solutions on a common platform
- Team structures to support multiple solutions
- Agile processes to enable coordination across programs

Challenges of scaling an agile organization

System
Architecture

Teams

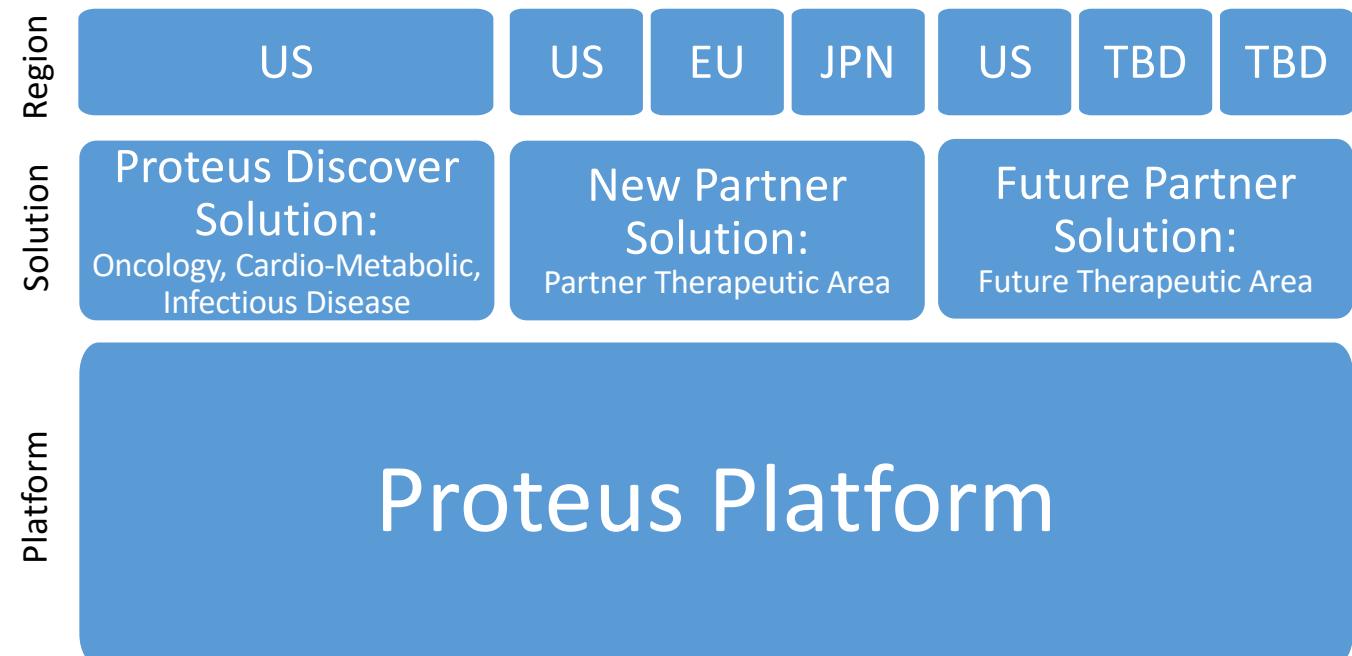

Agile
Processes

Proteus Discover

Oncology,
Cardio-Metabolic,
Infectious Disease

Architect system to build solutions on a common platform, with regional variation

Organize teams by Solutions and Platforms to plan, execute, and deliver products, solutions, and services

Solution Trains

Discover Solution (Oncology, CMB, ID)

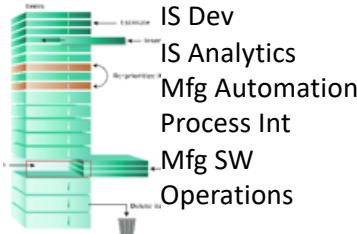

Partner Solution

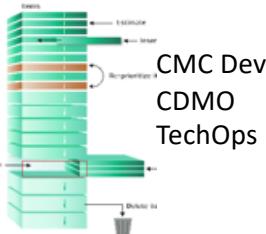

Platform Trains

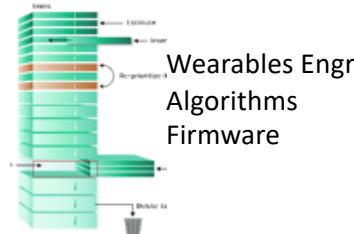

Ingestibles Platform

DigiMeds Platform

Wearables Platform

Software Platform

Update program ceremonies to enable scale

Program Backlog Grooming

- Prioritize and Define Features in the Program Backlog
- Weekly

Scrum of Scrums

- Resolve Dependencies Between Scrum Teams
- Weekly

Product Owner Sync

- Measure Progress, Adjust Priorities
- Mid-Sprint

Program Review

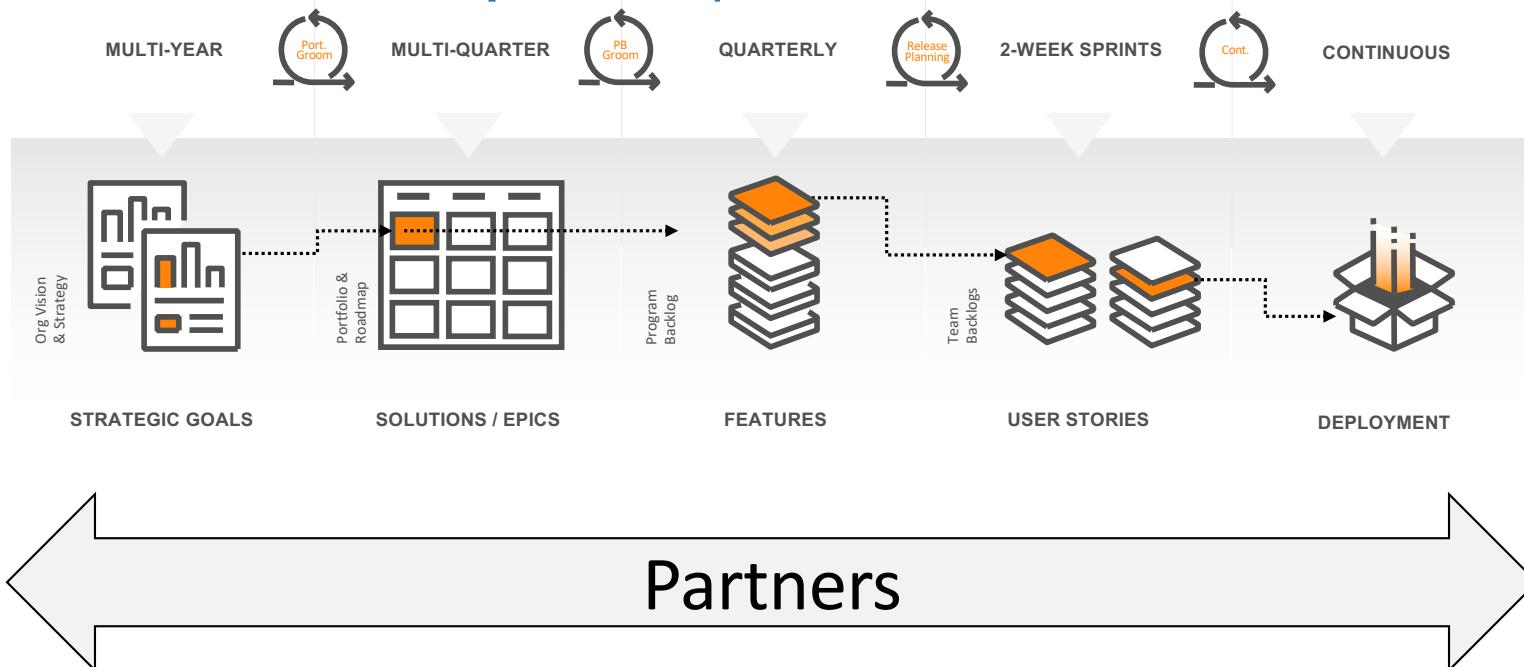

- Share Metrics on Accomplishments
- End of Sprint

System Demo

- Show Progress with Stakeholders
- End of Sprint

Integrating partners into the planning framework enables frequent stakeholder input and high levels of transparency

Conclusion: Scaling an agile organization requires retooling

- Modify system architecture to support building multiple solutions on a common platform
- Form programs with small, fully staffed scrum teams and strong leadership
- Update agile processes to support flow of work from corporate goals to team-level stories and provide a framework for coordination across teams
