Abstract

- INCOSE's Vision 2025 identifies the development of **Systems Thinking** and **Technical Leadership** as one of seven key areas of Systems Engineering '**Competency**' required for delivery.
- This requirement drives the need to rapidly expand the **art** and **science** of **Systems Technical Leadership**.
- In response, INCOSE established the **INCOSE Institute for Technical Leadership**.
- This paper describes the Institute and the work that the first Cohort ("Cohort of 2017") has accomplished on developing a **Technical Leadership Model for Systems Engineers**.
- We envision that this first **Technical Leadership Model for Systems Engineers** will be further developed and matured by the following cohorts of **INCOSE's Institute for Technical Leadership**.

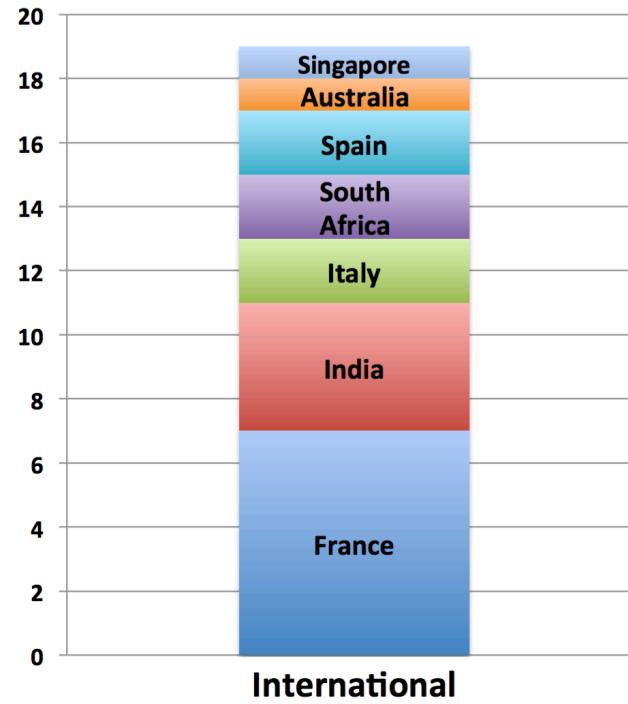

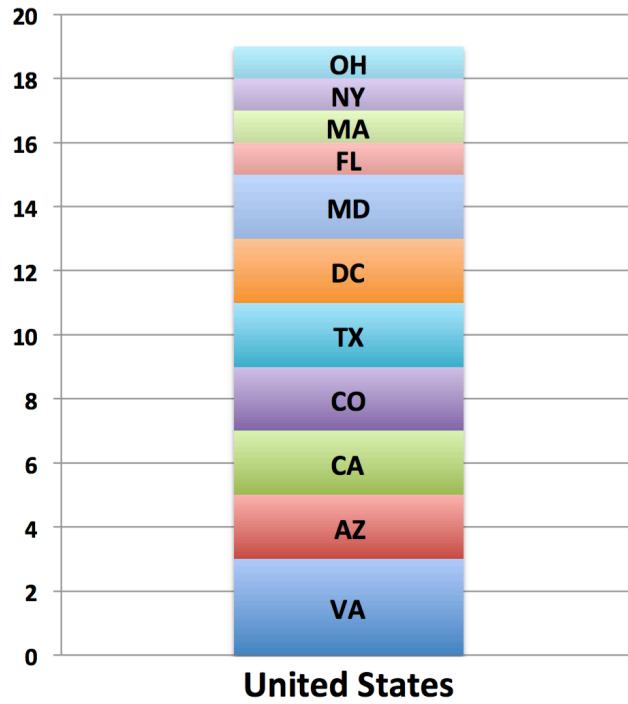

Authorship Acknowledgement

- The leadership model paper was produced by the joint efforts of the 2015/17 Cohort:

– Hari Devarapalli	– Isaac Burk	– Ramesh Ramakrishnan
– Kimberly Gill	– Bernardo Delicado	– Zane Scott
– DeAnthony Heart	– Quoc Do	– Andrew Wheeler
– Ben Hudson	– Diana Mann	– Coach Mike Pennotti
– Edwin Ordoukhanian	– Dave Mason	– Coach Don Gelosh
– Amaury Soubeyran	– Michael Do	– Coach Patrick Godfrey
– Earnest Ansu-Gyeabour	– Bill Good	– Coach John Thomas
– Olivier Dessoude	– Suja Joseph-Malherbe	– Coach Ruth Deakin Crick
– Serge Landry	– Juan Llorens	
– Rudolph Louw	– Jonathan Rigaud	
– Jason Sohlke	– Ahmed Abdelkhalek	
– Courtney Wright	– Stephanie Chiesi	

Participants

**38 participants, 5 continents, 8 countries and
11 U.S. states!**

Introduction

INCOSE's Vision 2025 (INCOSE 2015) has set out a vision for:

- Expanding the **APPLICATION** of systems engineering across industry domains
- Embracing and learning from the diversity of systems engineering **APPROACHES**.
- Applying systems engineering to help shape policy related to **SOCIAL AND NATURAL SYSTEMS**.
- Expanding the **THEORETICAL** foundation for systems engineering.
- Advancing the **TOOLS** and **METHODS** to address complexity.
- Enhancing **EDUCATION** and **TRAINING** to grow a **SYSTEMS ENGINEERING WORKFORCE** that meets the increasing demand.

Introduction

- In 2015, INCOSE established the Institute for Technical Leadership
- The Institute's Purpose:

As INCOSE continues to grow in an ever more complex and interdependent world, we seek to accelerate the development of systems engineering leaders who will exemplify the best of our organization and our profession.

Introduction

- The Institute's Benefits:
 - Individual members will become more capable leaders within their organizations.
 - INCOSE will have a growing pool of capable leaders from which to draw on, filling leadership positions.
 - INCOSE's international reputation will be enhanced by helping to develop systems engineering leaders of the highest caliber.

What is Leadership and Why is it Important?

- Companies today are like modern tribes with traditions, symbols, language and leaders. (Sinek 2014)
- The purpose of a leader is to ensure leadership – a series of inter-related choices and actions which define and realize a purpose. (Scouller 2011)
- Although it is readily assumed that being in a certain position makes one a leader, this is not necessarily the case as has been shown numerous times in recorded history. (Maxwell 2013)
- None of the well-established references to leadership development focus on the need for systems technical leadership or the specific requirements of leadership in conditions of socio-technical complexity.

What is Leadership and Why is it Important?

- Distinctions can be drawn between the attributes of leaders and managers, although one person can do both.
- There can be no single prescription for leadership competency.
- Leadership requirements are context dependent – situational leadership vs. positional leadership – Winston Churchill is a good example.
- For the purposes of this project, we have avoided defining what technical leadership is – we first wanted to discover what it meant to the cohort – all were selected for their leadership potential in systems engineering.
- Our paper captures and describes the emergence of a shared definition of the purpose and processes of Systems Engineering Leadership.

Team Models

- ARZSAD - Stakeholder Views of Technical Leadership
- The Inspirations - The Inside Looking Out Model

ARZSAD

Stakeholder Views of Technical Leadership

The Inspirations – The Inside Looking Out Model

We are seen (by the world) as:

I bring to the team:

I am:

humble
able to learn fast
not afraid of the unknown
have wide interests
disciplined
persistent

We are able to change the world for the better by developing/building products and services that is relevant.

having vision

clarity

humour

empowerment

inspiring when working towards a shared purpose

inspiration

convincing

team player

being able to integrate people and ideas

trustworthy

I am an essentialist and am not afraid to engage with Uncertainty

The team is cohesive. The engagements are passionate.

How the Model was Generated

- INCOSE Technical Leadership programme followed a strategically planned charter
- The Model creation benefitted from an internationally and disciplinary diverse set of contributions
- The differential between technical leadership and management had to be clarified and a common baseline determined
- Four models were initially conceptualised and then converged – not combined, converged
- Testing of it was then performed which is dealt with after this section
- Six core elements have been identified and elaborated upon

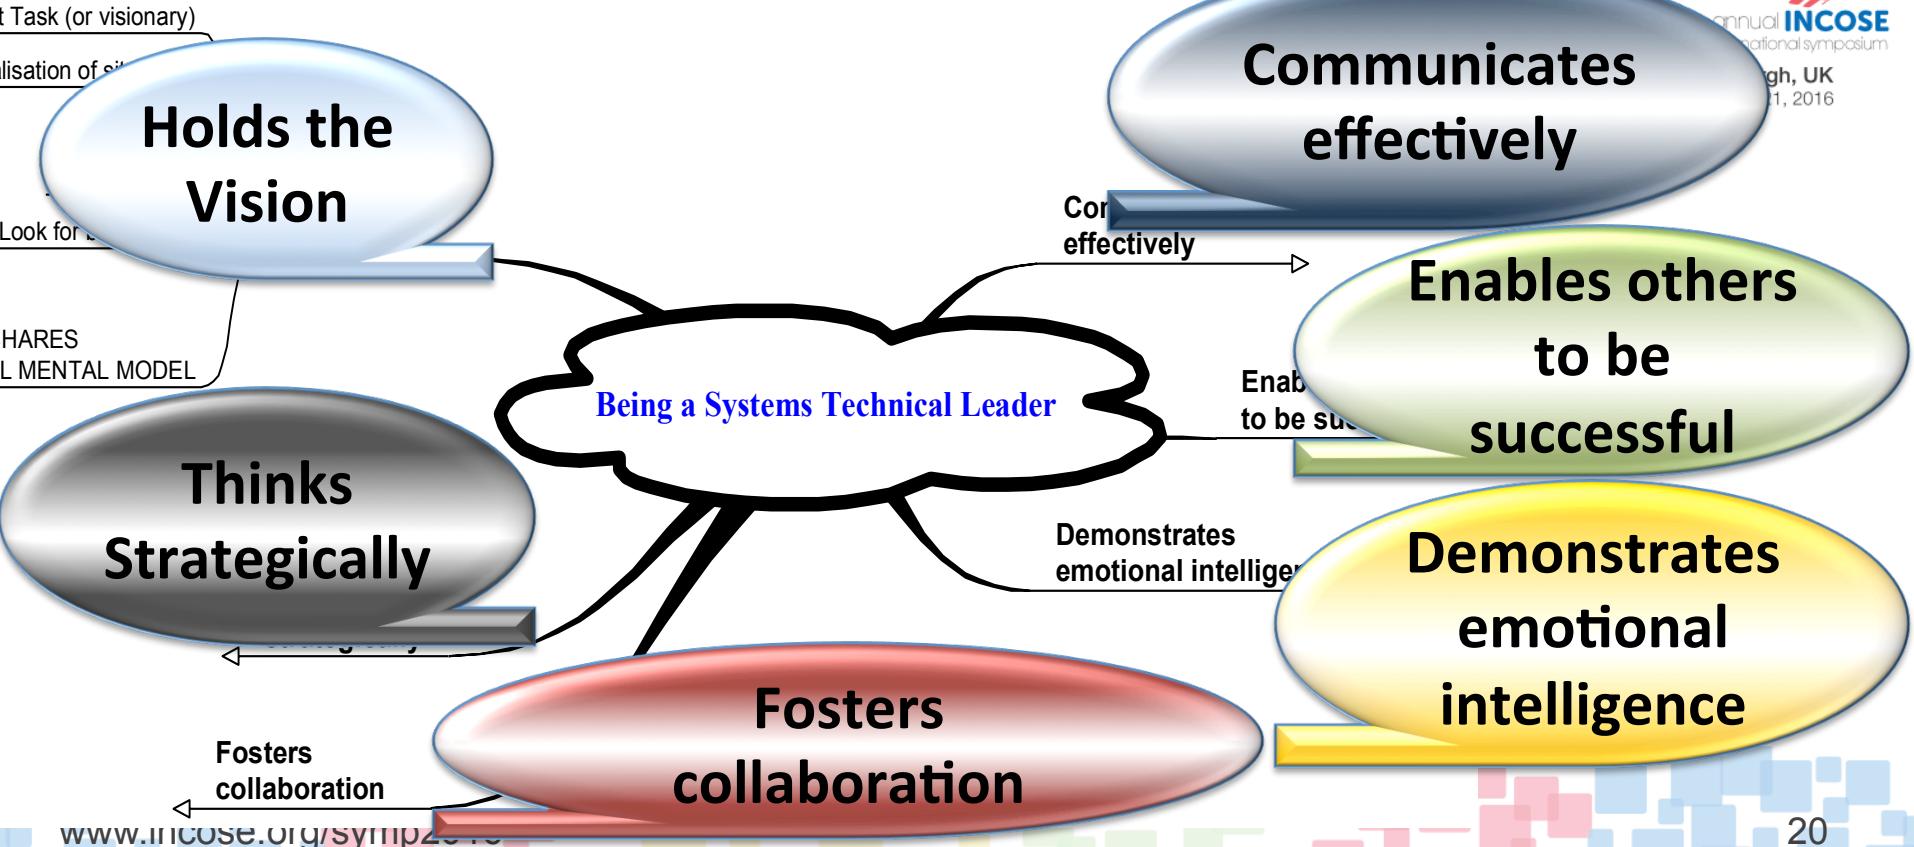

6 Strands of Leadership Identified – no specific sequence

1. *Holds the Vision;*
2. *Thinks Strategically;*
3. *Fosters Collaboration;*
4. *Communicates Effectively;*
5. *Enables others to be successful;*
6. *Demonstrates Emotional Intelligence.*

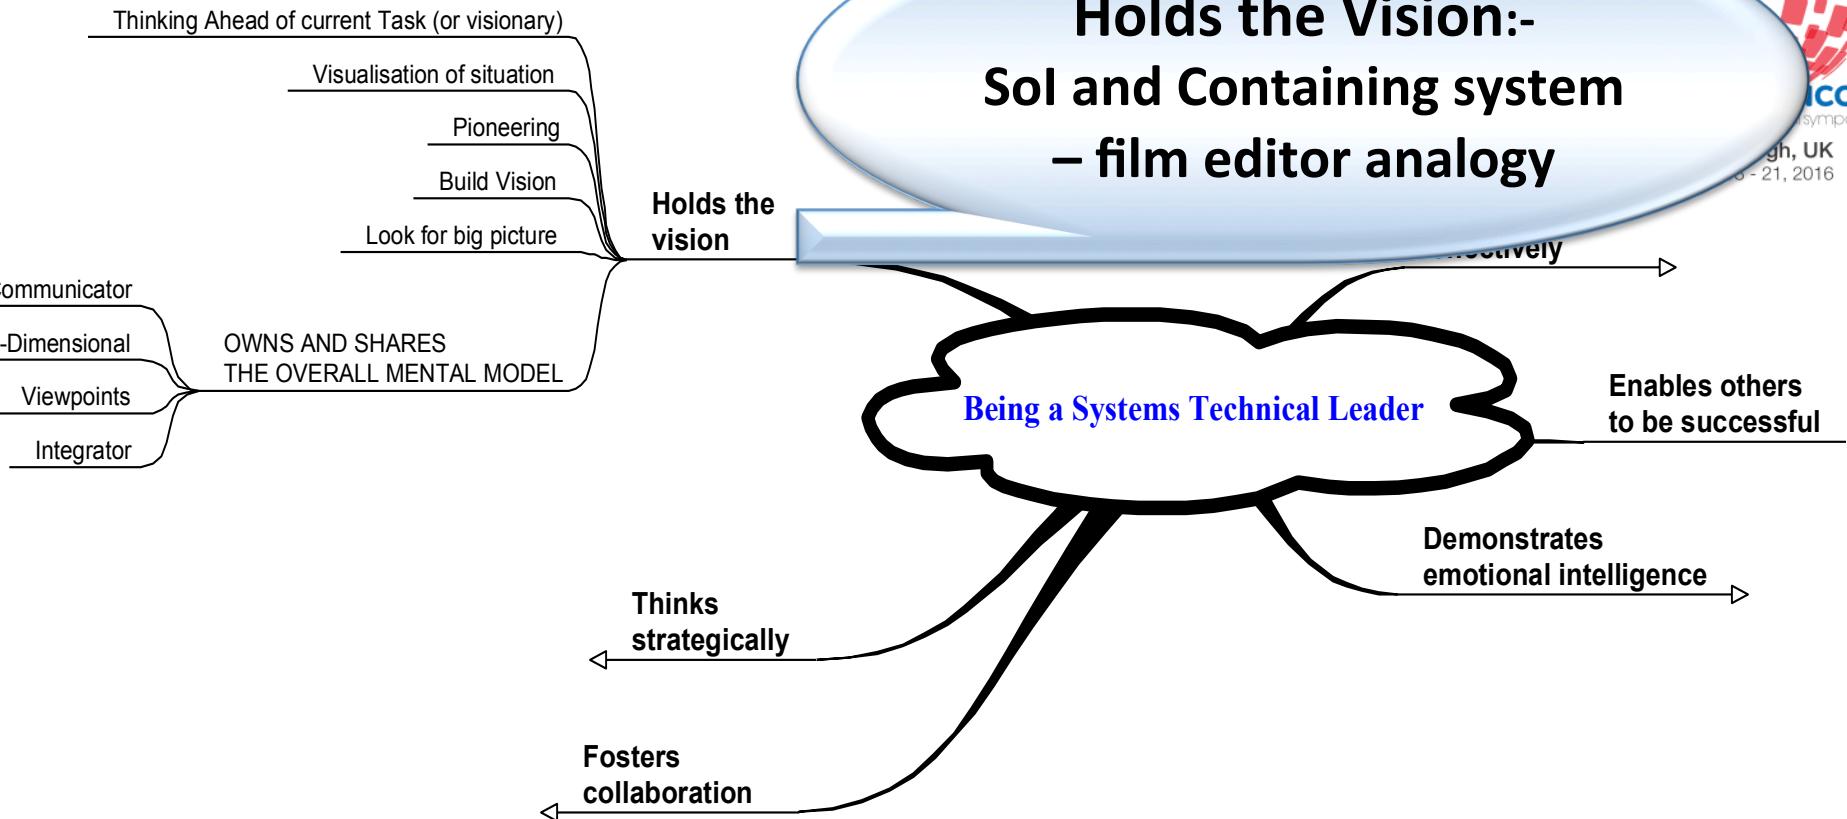

6 Strands of Leadership Identified –

no specific sequence

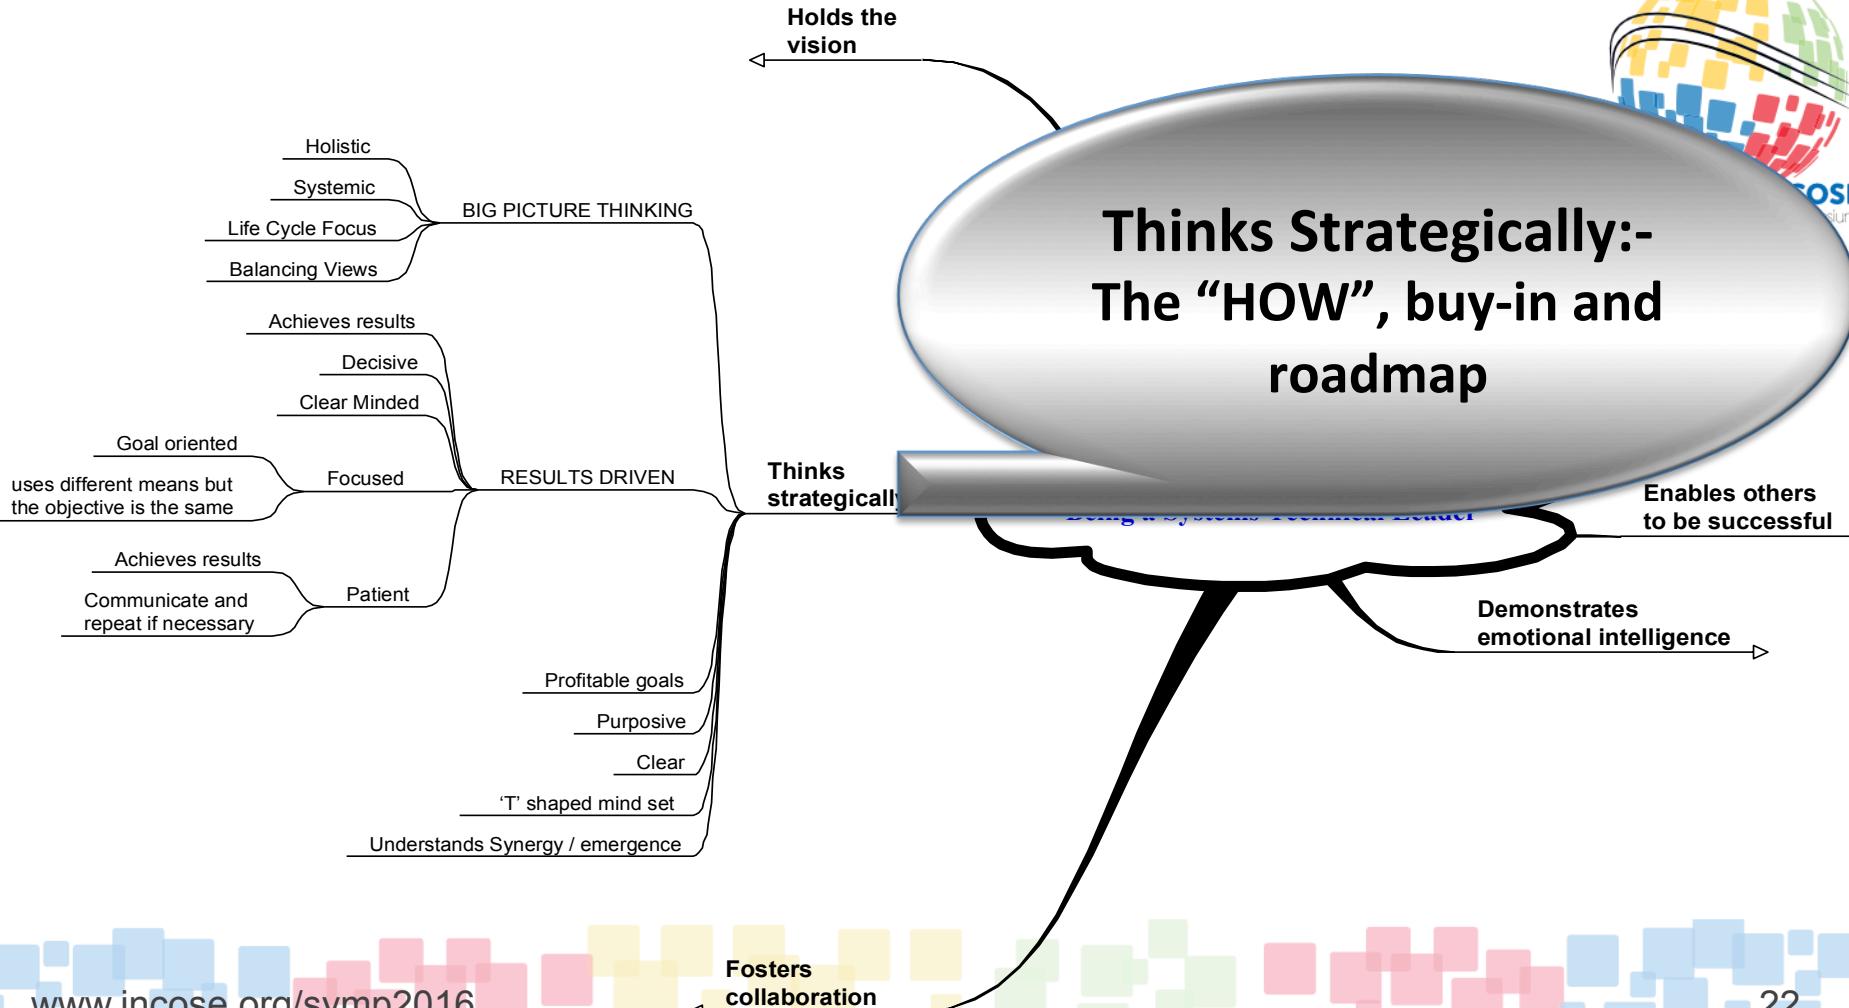

Holds the Vision:- SOL and Containing system – film editor analogy

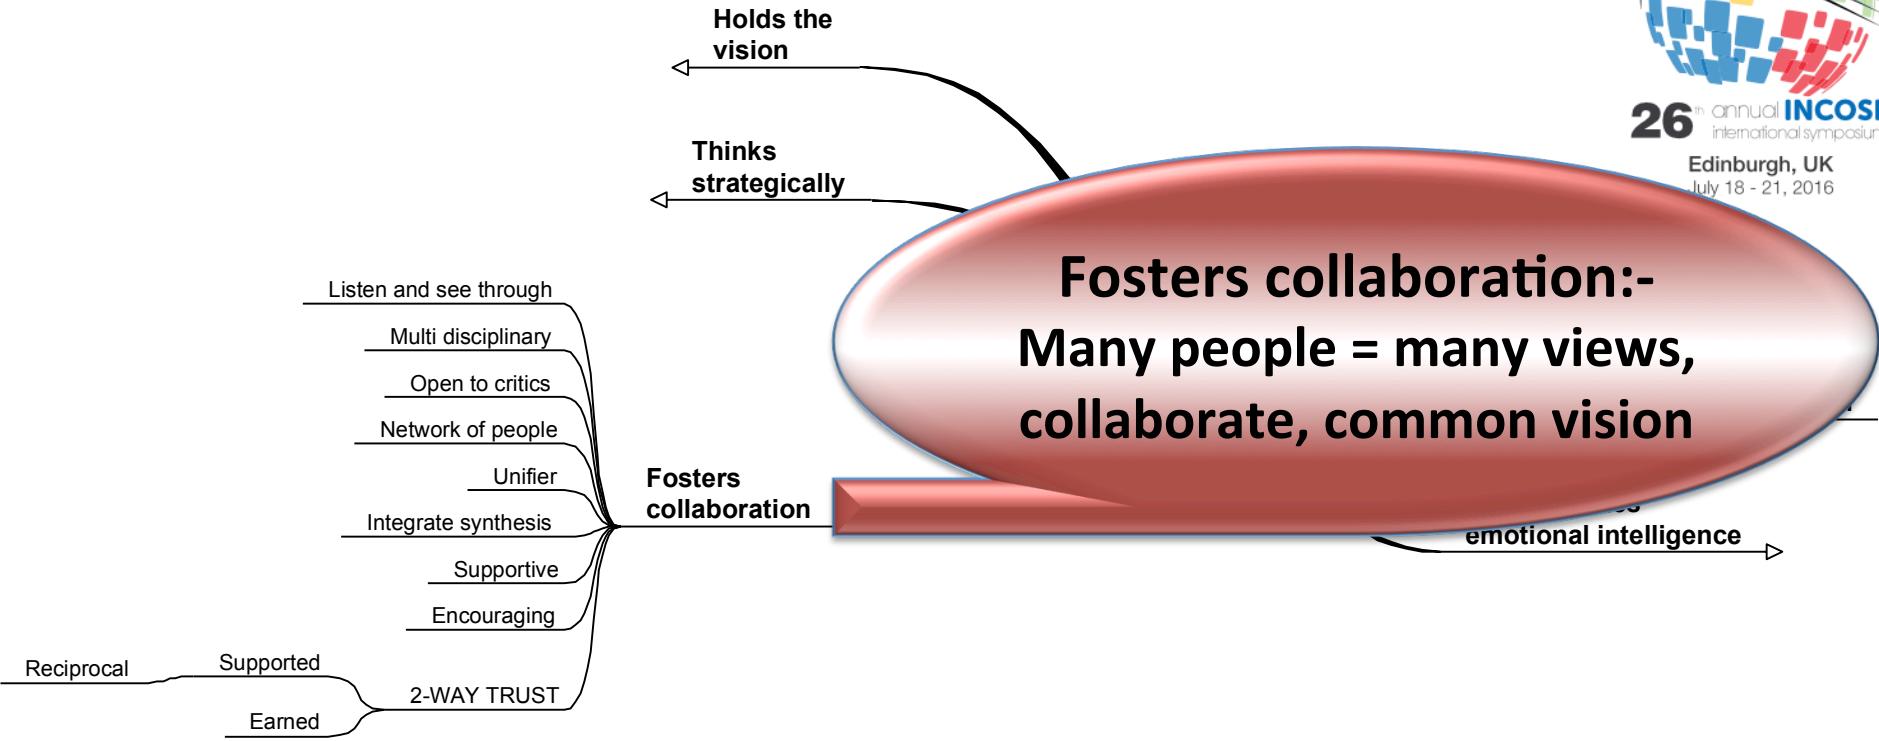

Thinks Strategically:- The “HOW”, buy-in and roadmap

Fosters collaboration:- Many people = many views, collaborate, common vision

Communicates effectively:-
Active listening, terminology, respect

Holds the vision

Thinks strategically

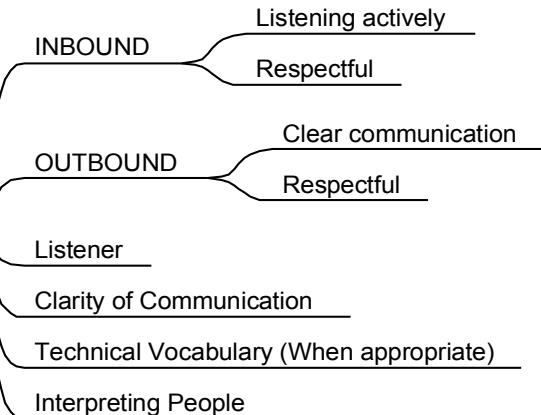

Fosters collaboration

Being a Systems Technical Leader

Communicates effectively

Enables others to be successful

Demonstrates emotional intelligence

Enables others to be successful:-

Synergy – people & components, no-one succeeds unless everyone do, enabling others, when to step back...

Communicates effectively

Enables others to be successful

strategically

Fosters collaboration

Demonstrates emotional intelligence

STAYS CURRENT

Innovative
Promotes thought
Facilitator
Supportive
Resourceful
Helpful

Enables learning to deal with Uncertainty arising from complexity

Edinburgh, UK
July 18 - 21, 2016

PERSONAL CHARACTER

Ethical
Flexibility
Integrity
Exceptional Character
Compassion
Visionary
Technical Credibility
Apply Principles and Processes

EMPOWERMENT

Value and Ownership
Effective
Ownership
Influence
Cohesion

Demonstrates emotional intelligence:-
Perceptive of others' needs, win-win, "have fun"

Fosters collaboration

Technical Leader

Demonstrates emotional intelligence

Communicates effectively

Enables others to be successful

Passionate

- Courage
- Influencer
- Motivator
- Enthusiastic
- Good communicator
- Role Model
- Exemplar
- Leads by Example
- Supportive
- Encouraging

INSPIRING

- Trust
- CALM
- Provides steadiness
- Positive
- Humour
- Empathy with Problem

- Human Touch
- Humble
- Benevolent
- Supportive
- Patient
- Curiosity

APPROACHABLE

Conclusions

- Emphasis on People skills
 - Enabling Others
 - Emotional Intelligence
- Need for integration of social science
- Adaptive leadership
- Further validation
- Thursday's events

Thursday's events

Cromdale Hall level -2

World Café

08.00 - 09.30

Share your experiences

Interactive Panel

10.00 - 12.10

Explore the future

Systems Engineers are called to Lead!

In today's uncertain world, technical leadership will be vital to success. Join members of the INCOSE Institute for Technical Leadership in helping build a Technical Leadership Model for Systems Engineers:

- **Invited Paper – Tuesday 10:45 -- Carrick Hall**
Learn about the initial model, how it was built and plans for further developing and validating it.
- **World Café Discussions – Thursday 08:00 – Cromdale Hall**
Share your observations and experiences of technical leadership to help improve the model.
- **Interactive Panel Session – Thursday 10:00 -- Cromdale Hall**
Explore and evaluate the model in an interactive engagement with your INCOSE peers.
