

**26<sup>th</sup>** annual **INCOSE**  
international symposium

Edinburgh, UK  
July 18 - 21, 2016

# Assessing System Development Risks

Matthew David  
**HMGCC**  
Her Majesty's Government Communications Centre

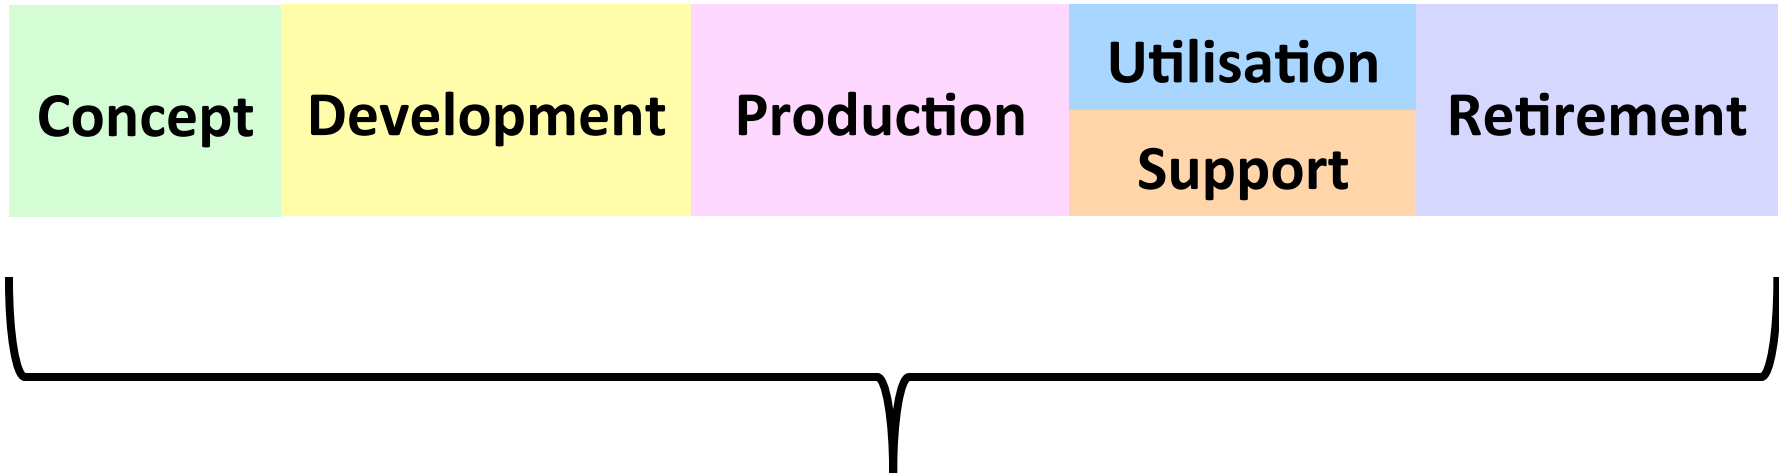

# Overview

- Why projects fail
- Categories of risk
- Difficulty assessment
- Assigning resources
- Lessons Learned
- Example

# Why do projects fail?

# Categories of risk

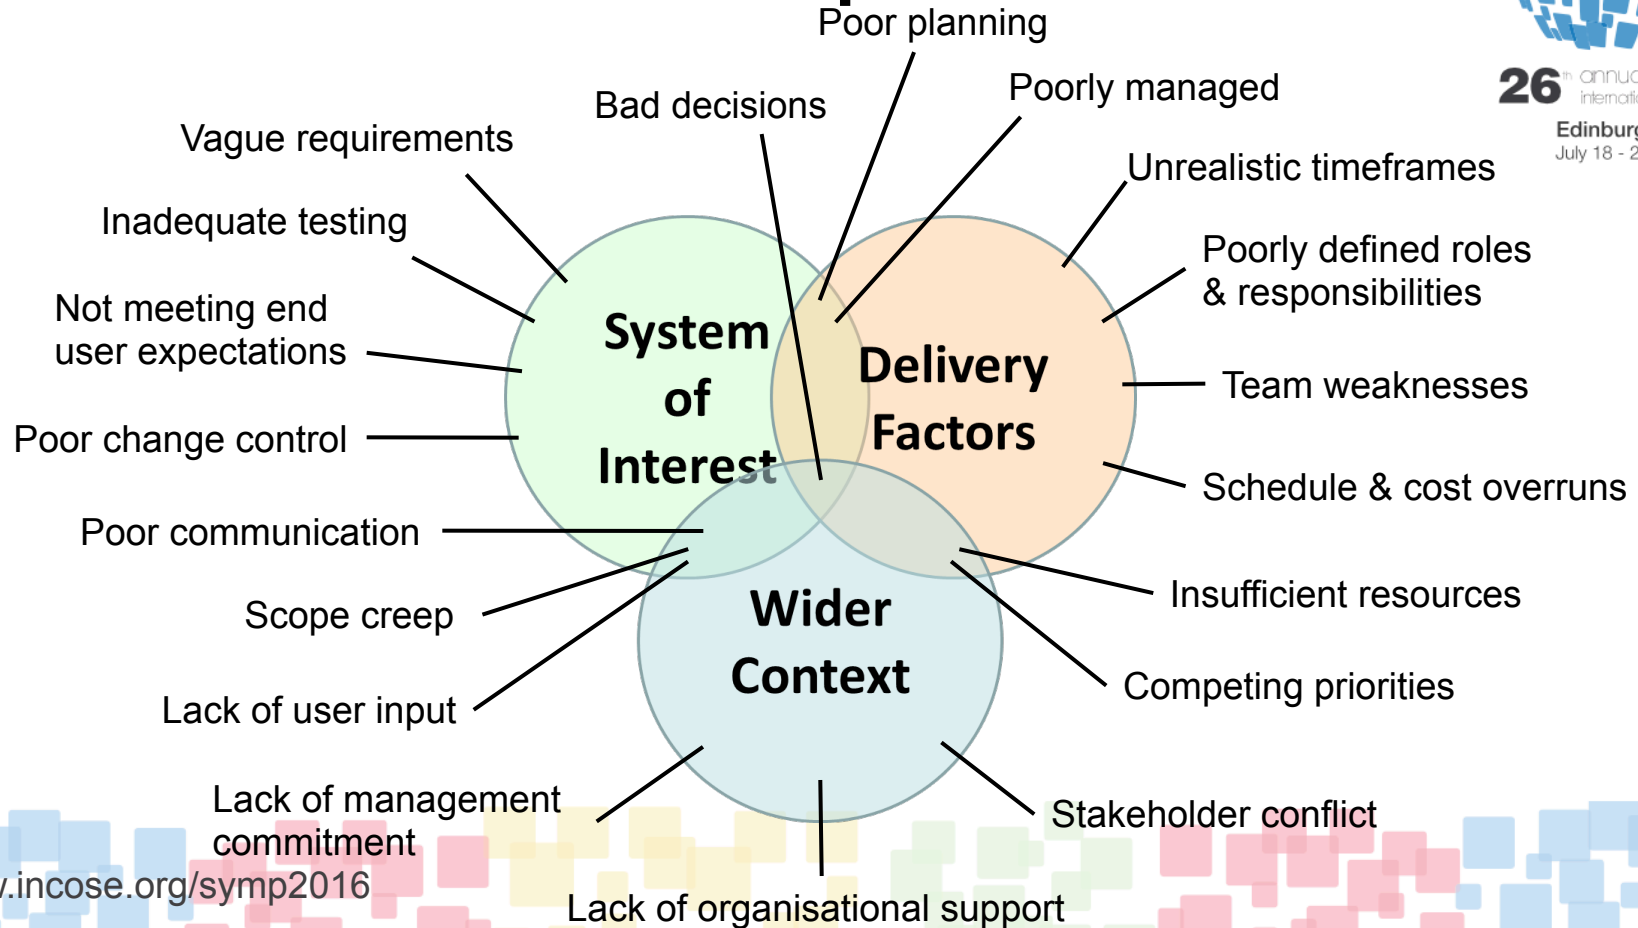

# Risk examples

26<sup>th</sup> annual **INCOSE**  
International Symposium

Edinburgh, UK  
July 18 - 21, 2016

# Difficulty assessment

Category	Risk Area	Difficulty Level
System of Interest	Requirements uncertainty	1
	Architecture complexity	2
	Technology novelty	1
Delivery Factors	Cost	3
	Duration	3
	Team focus	4
Wider Context	Strategic importance	4
	Reputational risk	4
	Stakeholder commitment	3
	External interfaces	2

# Overall difficulty

# Team competence

- Project Manager
- System Engineer
- Technical Manager
- Senior Responsible Owner
- Specialist Engineers

Associate Engineer/Manager

# Team Responsibilities

# Project resources

# Corporate governance

# Lessons Learned

- Quality depends on assessor(s)
- Some risk areas more critical than others
- Assess several times during lifecycle
- Higher risk profile early in lifecycle
- Development of staff
- Organisational metrics

# Example requirement

- Total Galactic Domination

# System of interest

**26<sup>th</sup>** annual **INCOSE**  
international symposium

Edinburgh, UK  
July 18 - 21, 2016

# Delivery factors

**26<sup>th</sup>** annual **INCOSE**  
International symposium

Edinburgh, UK  
July 18 - 21, 2016

# Wider context

# Edge of chaos outcome

**26<sup>th</sup>** annual **INCOSE**  
International symposium

Edinburgh, UK  
July 18 - 21, 2016

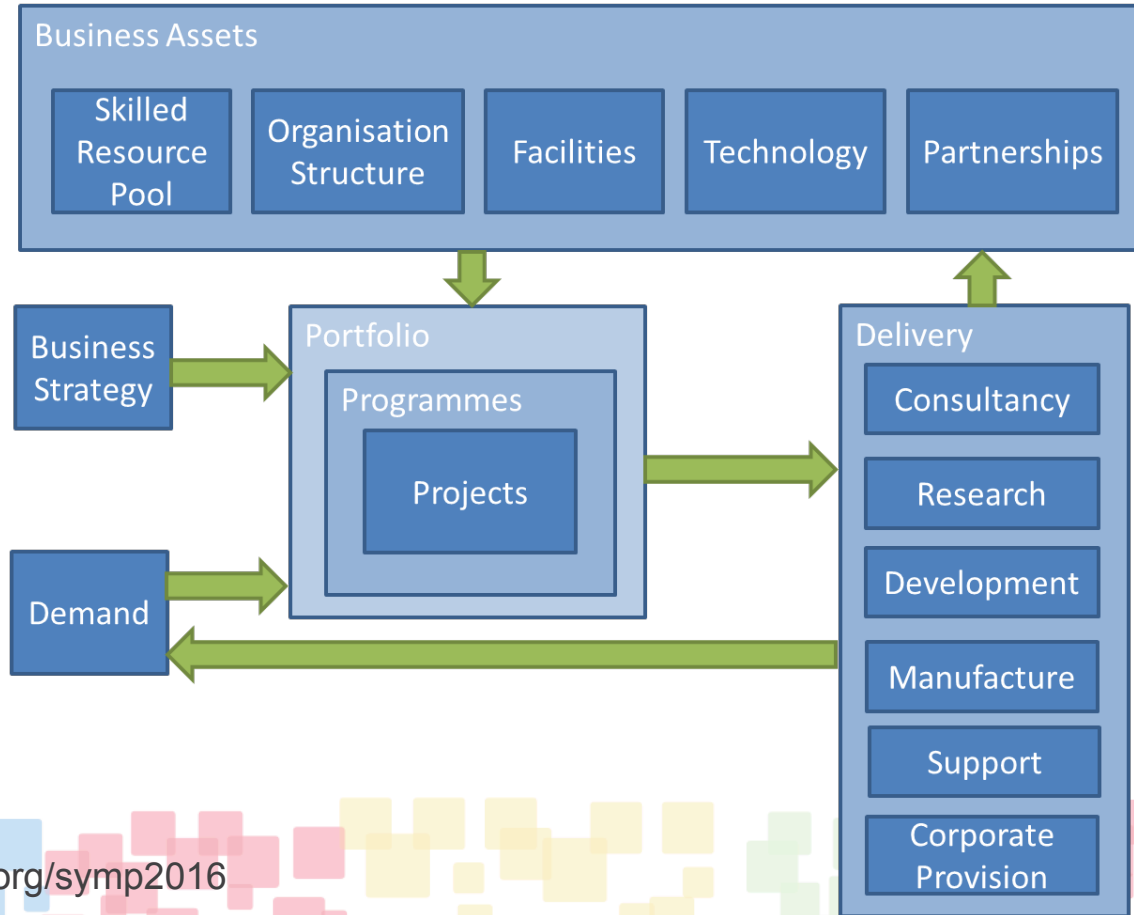

**26<sup>th</sup>** annual **INCOSE**  
International symposium

Edinburgh, UK
